

Thank you for taking the time to let us voice our concerns today. Many of us sacrificed a day's pay to be here today in person because we know how important this issue is today for our future. I am not a lobbyist or someone who works for an advocacy organization but a taxpayer and a small business owner who is concerned for my future and the others like me. We all want clean air and water, but we also need our jobs to take care of ourselves and our families. This ACC II is an aspiration masquerading as a green road map for California. We are simply not ready.
