To Whom it may concern,

It appears that CARB in there current outline of Red Sticker program changes has failed to understand and capture the importance of riders having access to meaningful practice for competition events on private, local, state, and federal lands.

I believe the collective weight of the proposal could have an unintended and devastating impact on competition events, riders, and other related stakeholders including land management agencies in the State of California.

Ensure law enforcement has the ability to access vehicle ownership and registration for competition off-road motorcycles through use of a 17 digit VIN. Additional benefit for financing and insuring competition labeled off-road only motorcycles.

Ensure competition off-road motorcycle owners fund OHV-related land management, restoration, law enforcement, vehicle registration, safety, education, and youth training programs.

Allow for the purchase, operation, and resale of competition labeled off-road motorcycles for use by racers at sanctioned "closed-course" or skill-based off-road motorcycle competition events (i.e. GP, Hare Scrambles, Enduros, Trials, etc.) and for practicing for participation at sanctioned off-road motorcycle competition events.

Safeguard the future of off-road motorcycle races/events and related race practicing.

Measure the true economic impact of revising the Red Sticker program, as related to dealer sales and parts and accessory sales, along with the impact to local communities that depend on OHV recreation for income.

Be realistic about the insignificant environmental improvement such restrictions would have as compared to the recreational enjoyment Red Sticker vehicles provide.
