Subject: Adopt a strong Innovative Clean Transit rule

CAUTION: This email originated from outside of the organization. Do not click links or open attachments unless you recognize the sender and know the content is safe.

California has always been in the lead of adopting rules that help preserve our environment. Please continue this great tradition.

I urge you to use the Innovative Clean Transit rulemaking process to mandate all California transit agencies to transition to entirely zero-emission bus fleets by 2040.

We have the technology to put zero-emission buses on the road today -- and the science tells us we can't wait to take action. Therefore, the rule should also set ambitious short-term targets as well, to get at least 1,250 zero-emission buses on California's roads by the end of 2021.

Sincerely,

michael-leonard creditor
