Anne Hayes

Director of Development, Western Region, Climate Central

Kirsten Liske,

Vice President of Community Programs, Ecology Action

Nelly Vaquera-Boggs

President, Pájaro Valley Federation of Teachers

Re: Electrify America's Cycle 3 investment plan

Regeneración is fortunate to be part of a coalition led by Ecology Action implementing a Central Coast Collaborative ZEV initiative. We are currently making a significant difference in public awareness about the affordability, convenience and availability of electric vehicles throughout a number of communities in 6 counties thanks to Electrify America's investment.

We are really pleased to learn about another cycle of funding and fully support this program. The slate of proposed investments look excellent. We believe the public education and awareness campaign is a crucial piece, especially in low income communities who have barely begun to benefit from the transition to ZEVs.

Sincerely,

Nancy Faulstich,

Director, Regeneración
