

April 7, 2017

Governor Jerry Brown
State Capitol, Suite 1173
Sacramento CA 95814

Mary Nichols, Chair
California Air Resources Board
1001 I Street
Sacramento CA 95814

Esteemed Governor Brown and Honorable Chair Nichols:

On behalf of Friends of the Earth – United States (FOE-US) this petition with more than 6,000 California resident signatures are provided as comment on the *Draft 2030 Target Scoping Plan Update (SPU) and Related Public Workshops (Workshops)*. Friends of the Earth – United States defends the environment and works for a healthy and just world. The substance of this petition goes to the heart of our environmental and social justice concerns regarding the road map for future California climate policy as it is presented in the SPU. Clearly there are tremendous challenges to be met, and we appreciate the enormity of the task put before the Air Resources Board (ARB) staff for developing an economically just, ecologically literate, and scientifically defensible plan for the State of California to meet greenhouse gas emissions reductions goals.

We commend the State of California political leadership for taking a vocal and public stance challenging those political forces that would suggest that global climate change does not present tremendous risks and existential threats to human society and the planet's life systems. We are steadfast in our belief that making a priority of addressing climate change is an imperative for the State of California, and we appreciate the public stance regarding the importance of addressing climate change that has been taken by political leadership in the state government.

Our organization and the undersigned humbly request that this petition be considered:

The environmental justice community in California has made important recommendations to improve the 2030 Scoping Plan for meeting the state's ambitious greenhouse gas emissions reduction objectives. These recommendations include prioritizing reducing greenhouse gas emissions at their source and abandoning the scientifically dubious, economically inequitable and socially unjust pollution trading mechanisms of California Cap-and-Trade. California can and must be a global climate leader by aggressively and effectively addressing the state's addiction to fossil fuels. Please incorporate the recommendations of the Environmental Justice Advisory Committee into the Scoping Plan, and prioritize emissions reductions at the source.

Thank you for your attention to this petition.

Respectfully,

A handwritten signature in black ink that reads "Gary Graham Hughes".

Gary Graham Hughes
Senior California Advocacy Campaigner
