Re: Aliso Canyon Gas Settlement

Hello,

My name is Gayle Grech and I am a resident of Porter Ranch, Ca. I lived through the Aliso Canyon Blowout and it was awful. Unfortunately, we are still not back to normal and the new "normal" is not acceptable yet. Because the Aliso Canyon Storage facility is still leaking, I am still getting headaches. They go away when I go to work in Burbank but return occasionally when I go home. Usually upon reviewing the monitors for the methane in the area, the headaches are explained because the methane in the area is above the healthy limits.

I am extremely disturbed that this lawsuit is not addressing the continuing problems of this facility leaking and helping this community heal, but instead the lawsuit is putting a lot of this money towards capturing cow gas? This is extremely thoughtless, insulting, and flat out wrong.

Please take into consideration that this lawsuit was to remedy the problems that the Sempra Gas Company created with this faulty gas storage facility. This needs to be addressed first. Either fix it so that it never leaks or shut it down because people shouldn't be made sick when they just want to go home.

Thank you,  
Gayle Grech
