ARB Public Hearing

Public Hearing to Consider Proposed Amendments to the California Consumer Products Regulations

November 17, 2006

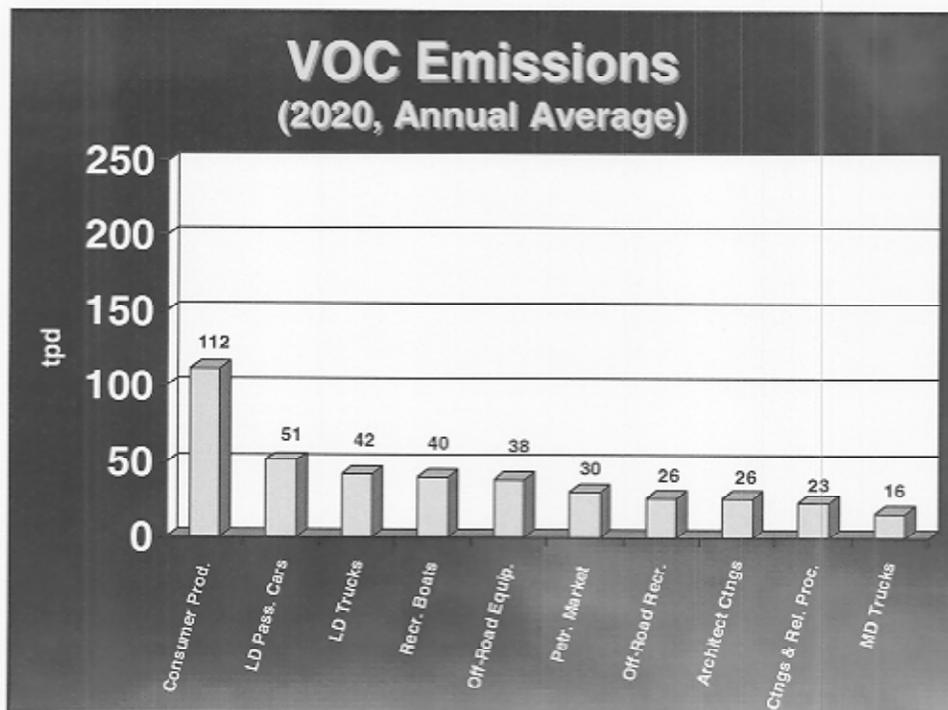

SCAQMD Staff
Comments

Recommendation

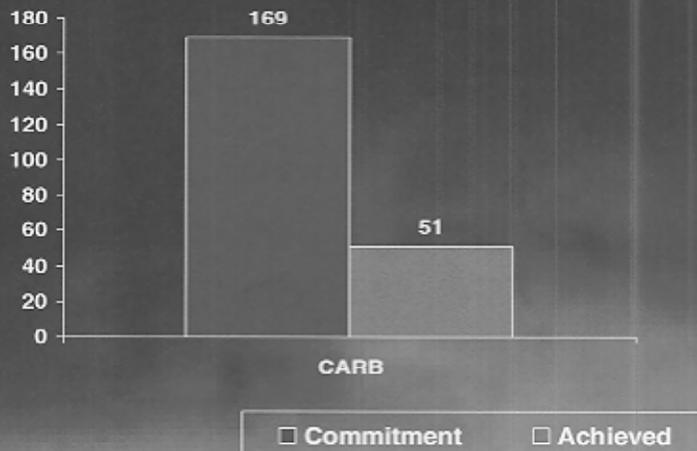

- Adopt Original Staff Recommendation
 - 10% VOC content by 2008
- Consider SCAQMD Rule 1171 Limits of 2.5% VOC Content by 2010

Key Policy Issues

- Single Largest Emission Contributor
- Behind in 2003 AQMP Commitment
- 2007 AQMP Reduction Needs
- Delay in Emission Reductions Not Warranted

Progress Under the 2003 AQMP (2010 VOC & NOx, tpd) Short-Term Measures

Needed Pollution Reduction (tons per day)

	2014	2020
NOx	239 (36%)	286 (54%)
VOC	142 (24%)	300 (50%)
SOx	49 (70%)	---
PM2.5	14 (14%)	---

Delay not Warranted

- Technically feasible and cost effective
- Further reformulation likely needed for 8-hour ozone attainment
- Emission reduction delayed significant for SCAB
 - Dry Cleaning ATCM Trade-off: 0.8 tpd of VOC
 - Proposed Delay: 3 tpd of VOC
