

09-10-8

My name is Carlos Barrios. I also attend Mandela High and am in my junior year. This is my first year in the Youth for Clean Air program. Me and my classmates worked on a project to find out ways to reduce air pollution. There are a lot of highways in Oakland which truck drivers drive on. My group researched and supported a diesel reduction program. We found out that we can reduce the amount of pollution we breathe by changing the engines on diesel trucks or by adding filters. We would like you to support a diesel reduction program too. Thank you.
