**Subject:** CARB Meeting

I would like to add my input to the CARB meeting that will be taking place tomorrow, December 9, 2009.

I feel that the current regulation being voted upon is based solely on misinformation from a scientist who was not qualified and never graduated from UC Davis. I feel that we should not be compelled to comply with any regulation based on false information. The board needs to postpone any regulations until such time as the board feels it can justify, with facts, those regulations to the people of California.

The board so far has jeopardized small business by allowing regulations such as this to take place. California has lost jobs and lost revenue through taxes. I feel as though this board has worked against the people of California and the small businesses that employ them.

Sincerely,

James D Kilgore
