Just wanted to take a minute to express my displeasure with what you have done to the construction industry. With the current demands from CARB on Diesel powered machines you have forced us to reduce our fleet and with the reduction of machines comes the reduction of our workforce. In this economy it is hard enough to stay in business and then when the government steps in and places Restrictions and Excessive Fees in place it all but dooms our industry. I hope you guys are proud of yourselves and most importantly I hope you can sleep at night knowing that you have destroyed the working force in California. I speak from experience as I have been in this industry for over 30 years ! John Manring / Fleet Manager @ Schilling Corporation/ Paradise Electric
