Regarding the controversy on the data gathering to support the PM 2.5 report/rule change, please carefully consider the potential for enacting misguided regulations. You are all responsible for making the best decision with the information you have. This includes using wisdom as well as having a goal of cleaner air. Noone wants to breath unhealthful air, but be sure you are doing the right thing when you cast your vote on this major issue. Thank you for your service. jms jshapazian@bak.rr.com
