Knowing I have only 2 mins. ①
to describe the last 10 yrs. healthwise
of my family's life is ~~impossible~~ impossible.
So hear as some of the facts.
AGES RANGE FROM 2 - 87

9 ~~of~~ ^{of} 10 of my family suffer from:
Asthma, non seasonal year round allergies, Chronic
Sinusitis, rhinositis & bronchitis,
Chronic fatigue, systemic scleroderma
and fibromyalgia.

My uncle died of lung Cancer 2 yrs ago
Another Congestive heart failure

My dad had a heart attack

My son multiple ear surgeries and now
has permanent tubes in his ears

He had sinus surgery @ 4 1/2

He had croop 3 times in the
last yr. Unheard of @ his age
for the first time.

My mom developed severe asthma @ 50

My kids, nephew & mother use a nebulizer
regularly and medication for asthma.

My husband was never sick ^{before} ~~since~~
moving here. & has had pneumonia,
constant ear infections and tubes in his
ears.

~~We've lived in the~~ (2)
we were never sick before moving here
& had no family physician

My grandmother, father & I over the last 5 years have developed chronic sinusitis & bronchitis.

- My parents, sisters & nephew moved away, closer to the ocean hoping for better air quality but it's only slightly better.
- When the Santa Ana's blow or there is no ~~air~~ air movement, regardless of the temp, my air conditioner goes on.
- ~~WE~~ have a Living Air purifier given to us for my son, that without it, my son literally coughed himself to sleep.
- ~~Any~~ On my window sills, floors and in the purifier, black soot can be found.
- My daughter is often cranky only to find out it's because she's wheezing. Pretty sad when she brings to nebulizer to me to let me know she has problems breathing

I have several outstanding medical bills due to all the health problems and have no way to pay them. My kids are now uninsured, my husband out of work and my story is just one of many. My neighborhood is loaded with asthmatic people, young and old, all undeserving of this ~~poor health~~ ^{Air} Pollution related or caused health problem and Sorry, but building another baseball field in the shadows of the port just seem a little ironic to me when your going to be breathing a hell of a lot deeper & harder of deadly polluted air.

I've had several doctors tell me its all because of "air quality", but ~~arent~~ isn't "air quality? air pollution" the ~~the~~ same thing? Why not call it by it's true name...

The
Air Pollution ^{Level} ^{about the} ~~the~~ amount of
pollutants in the air ^{anyway} ^{or} once
that fact is Accepted, then
maybe, something will finally
be done about the so-called
"AIR QUALITY"

oops I mean ~~the name~~

The AIR POLLUTION LEVEL

Not such a pretty name ^{now} is it?
