RE: Proposed Regulation to Limit Ozone Emissions from Indoor Air Cleaning Devices

To: California Air Resource Board:

My name is Allen Johnston. I am the Chief Technology Officer for EcoQuest International; a manufacturer of Air Purification Equipment designed to produce low - effective levels of ozone for occupied spaces and moderately elevated levels of ozone for short-term quicker treatment of unoccupied spaces.

EcoQuest has manufactured millions of air purifiers with countless satisfied customers. Attached are letters from just a few of those customers showing the broad range of benefits this technology provides. For the sake of protecting CA consumers freedom of choice, please consider these testimonials before the regulation becomes final.

Thank you for your consideration.

Sincerely,

Allen Johnston  
Chief Technology Officer

October 25, 2005

Mr. Dave Tupman  
EcoQuest Technical Consultant  
11900 CR 509  
Anna, TX 75409  
Ph # 972-924-2665

Dear Dave:

I would like to thank you for the help and expertise you provided during our Strategic Space event held October 4-7 at the Quest Center in Omaha, Nebraska.

Just prior to our event, a rodeo had been held in the very space our exhibit hall would occupy. There were serious concerns about the strong livestock odors that remained. With approximately 1.4 million cubic feet of "scented" air space, the problem was not to be underestimated.

Despite enthusiastic mucking, sweeping, and mopping the rodeo odor was distinctive and we knew our attendees, including top military brass and corporate leaders, would not miss it either.

Fortunately for all involved, EcoQuest technology and expertise effectively eliminated the problem and helped make our 2005 Strategic Space event a tremendous success. Not one of our guests or attendees commented about air quality other than to say they couldn't believe a rodeo had taken place just hours before.

All of us at the Space Foundation are proud to have EcoQuest as a leading partner in our Space Certification program and we look forward to a long and mutually prosperous relationship.

Best regards

Kevin C. Cook  
Director, Space Technology Awareness

Jim,

After reading that respiratory tract infections are the most common nosocomial (facility acquired) infections, I wanted to again thank you for helping us with the purchase and installation of the EcoQuest machines. Our nursing home has had little or no respiratory tract infections since we installed the machines. One of the comments I hear most frequently is that there is no odor in the nursing home.

Again, thanks and if you come upon another product that performs as well as these units have be sure to contact me.

**Thanks.**

Dear Mr. Grijalva,

I am writing this letter to thank you and update you on you product, the EcoQuest Air Purification system.

As you know, I've been a third grade teacher for the past seven years. I enjoy teaching and love my profession very much. Though I teach at an older school in a portable classroom I would never want to change my location or grade level.

Just a few months ago, I was forced to call my site administrator for help. I am asthmatic and on this day I was having a difficult time breathing. In my classroom I kept an inhaler on my desk. My students had become accustomed to having me pull out my inhaler mid-sentence and use it as needed. I kept on teaching and they continued learning. It had never been a problem. In fact, it wasn't uncommon that I would require my inhaler up to seven or eight times in one day.

This one-day, however, was different. My inhaler was not in itself working. I still found myself struggling to breathe. My site administrator did find someone to come in and take over my class. I was taken home and did require a breathing treatment.

Soon after that, my site administrator, who has one of your Air Purification systems in his own home, inquired about having one put into my classroom. He received a unit from you and a test run was done in my classroom. Over the weekend he used the unit to do a deep clean of my classroom. On Monday when I returned to school, it was the difference between night and day. **Within the first week I was rarely using my inhaler. Students had asked if my asthma was cured.**

**Not only did I find that my own health benefited from having the Air Purification system put into my classroom, I found that fewer students in my class were out with colds. In fact, this year, students' attendances have only declined after a vacation break when they spent more days at home.**

I feel that it was a wonderful decision by my site administrator to have units placed in all portable classrooms. I feel that they should be in all classrooms, regardless of age. I am so confident in the benefits of the Air Purification system that I have had one placed in my own home. I am excited to see the difference for my own health at home, as well as the health of all of my family.

Thank you so much again. I am proof that it does make a difference.

Sincerely,

Mrs. Lori Recatto

**Dear Kay;**

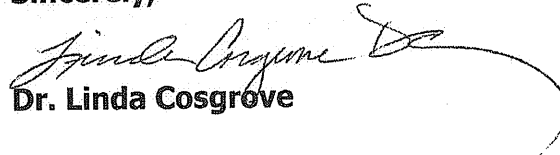

**I want to update you on my daughter's condition. As you know, soon after starting elementary school, she developed a skin condition caused by an antibiotic resistant bacterial infection.**

**We had been fighting this infection for several months when you approached me about the Ecoquest International RCI technology being helpful in the eradication of the MRSA bacteria.**

**We have put the machine in her room. After constantly fighting this chronic infection, I am pleased to report that since having the RCI Spectrum unit in her room, she has not had a single recurrence. This is quite a departure from the every few weeks outbreaks that she had been suffering.**

**Thank you for letting me know that this technology is available. I highly recommend this unit to my patients, friends, and family. This has been a blessing to our family. The unit itself is maintenance free and unobtrusive in the room. I can't thank you enough for telling me about it.**

**Sincerely,**

  
**Dr. Linda Cosgrove**

March 8, 2007

Mr. Gary Rothman  
Living Healthy Technologies

Laguna Niguel, CA

Dear Gary,

I just wanted to thank you for the wonderful technology supplied by your product, Fresh Air by Ecoquest. I have used my unit for several years with excellent results specifically in the fresh smell of my home and that is not an easy thing to achieve with two small dogs and a teenaged boy!

The Fresh Air unit was really put to the test during the last 6 months when I moved into a condo that, unbeknownst to me, was full of toxic mold. I was not using the unit when I first moved in because it needed a good cleaning. As a result, I ended up with serious health conditions pertaining to toxic mold inhalation including a severe cough, a runny nose, cognitive confusion, and sleep disruption. One of my dogs had to be taken to the vet and thankfully he is fine.

I performed the cleaning and turned my Fresh Air unit back on and it was an absolute miracle! I felt more focused and clear.

Thank you, Gary. You have a wonderful product and I believe everyone should have one!

Best regards,

Erin K. Baldwin, Chief Executive Officer  
The Baldwin Companies

Laguna Hills, CA 92653

*Excellence Now...And for the Future*

OFFICE OF THE ATHLETIC DIRECTOR  
Roger Bowen

Dear EcoQuest,

I am the athletic director of Vandalia-Butler High School. At this high school the health and wellness of our students and staff is of paramount importance. We have approximately 500 students involved in either school related sports activities (baseball, basketball, football, soccer, etc) or just personal physical fitness, as well as close to 100 athletic staff support members and volunteers. These students and faculty utilize our locker rooms, fitness room and training room.

This fall we encountered a serious health issue in our athletic facilities. This issue was in the form of the staph infection, impetigo. This situation began affecting our student athletes, to the extent that some of our football players were forced to sit out during key games. After an inspection by our medical staff it was determined that something had to be done beyond the short-term remedy of scrubbing the facilities with more harmful chemicals and sprays.

We contacted Indoor Environment Solutions to assist us. Al and Nate (owners) were able to produce third-party university testing to validate the effectiveness of this "Space Certified" equipment made by EcoQuest International. After examining these documents our staff was reassured that the technology would destroy 99.9% of any mold, mildew, bacteria, viruses or odors and prevent them from reoccurring within the above mentioned facilities. It was critical that this treatment be accomplished without any harmful effect on our students our staff.

I.E.S. came to our aid within 24 hours and initially destroyed all of the bacteria and odors (at no charge) with respect to the staff infection. They did this without the use of any harmful chemicals or abrasive sprays. We later had Indoor Environment Solutions install this equipment in the above facilities.

I would highly recommend to any school or facility which has a commitment to health and wellness for their students, children or staff to contact Indoor Environment Solutions.

Sincerely;

A handwritten signature in cursive script that reads "Roger Bowen".  
Roger Bowen

April 5, 2003

Dear Mariena,

As you requested, I am sending my skunk story to you and you can use it in whatever way you would like.

Because of my asthma and allergies, my Mom had purchased a Breeze AT by EcoQuest from you. We have a Cocker Spaniel, Sophie, that lives in the house but uses a dog door installed in the laundry room. One evening, about two weeks after we received the Breeze AT, we were watching the news in the living room and Sophie came running frantically into the house and jumped in my lap. She had been sprayed in the face by a skunk. She was drooling and her eyes and nose were running. I know that everyone knows what a skunk smells like, but this was so strong and pervasive that right at first we weren't sure what it was. I've never been assaulted by an odor like that. My eyes and nose were burning just from Sophie being in the same room.

We knew that we had to wash her in tomato juice (when you live in the country, you know these things) and I didn't have enough, so my husband began washing Sophie while I ran down to our son's house to get more juice. I stepped in his front door and he immediately knew what had happened.

We finished washing the dog as best as we could and then concentrated on the house. We were worried because the house was less than a year old and we were concerned that we would never get the smell out of 2500 sq ft. The odor permeated everything. I mean everything, including the furniture. We had been using the Breeze, but had not sanitized with it yet. We used that feature in the living room during the night. We were pleased with the progress the next morning, but could still smell some skunk odor through the laundry room and kitchen – basically the trail she came through the house after she was sprayed. So, we moved the Breeze to the laundry room and sanitized it and the kitchen.

By now, Randy and I have skunk odor up our noses and we weren't sure if the house was clear of the odor or not. My parents visited barely 48 hours later and could not detect any odor at all. However, the dog was still tinted pink from the tomato juice.

That weekend we found out that our son's house still smelled like skunk from the first night that I had stepped in the door to get some more tomato juice. I wasn't in his house for longer than 15 seconds, and Sophie hadn't been there at all, but it still penetrated his home. My house, that the dog actually came into, was totally clear.

We very highly recommend the Breeze AT by EcoQuest, and quite frankly, don't know what we would have done without it. It runs continually, and while it's not as dramatic as the skunk incident I feel that it helps my allergies and the house is less dusty.

I hope that you can use this letter in some way.

Thanks,

Denise Pernell

September 2, 2005

Dear Mike,

I would like to thank you for introducing me to the Fresh Air Purifier by EcoQuest.

I must admit, I was a little hesitant to try another machine, as I have tried others in the past only to be disappointed in their performance and longevity.

This machine is truly the most effective I have ever had in my home and its quietness is a wonderful bonus.

Also, I must say your willingness to work around my schedule for a demonstration and allowing me to try the machine free of charge made making my decision to consider another machine an easy one.

Thank you again for the wonderful work you are doing in making homes and businesses a better place.

Best Regards,

Tracy Van Zant-Zeller

ANIMAL HOSPITAL & PET STORE

August 29, 2006

Dear Jana,

VET PETS is a full service small and exotic animal hospital as well as a pet store. In our store area out front we offer a wide variety of amphibians, reptiles, rabbits, birds, etc., as well as food and other needs these animals have. In the back area is our hospital and kennel.

As with any environment providing these services, we have a big problem with odors. Over the years we tried many different products, but nothing really made a big difference, until your product line.

Our staff unanimously voted to keep these air purifiers because they not only noticed a difference in the air quality, but they also heard our clients' comments about the air smelling so much better.

Thank you for taking the time to work with us to get the right combination of equipment to do the job. We will recommend these units to any of our clients who have similar odor issues in their homes.

Sincerely,

A handwritten signature in black ink, appearing to read "David Hannon", with a long horizontal line extending to the right that ends in an arrowhead.

David Hannon, DVM

# SOUTHPOINTE MOTORCARS

February 2, 2006

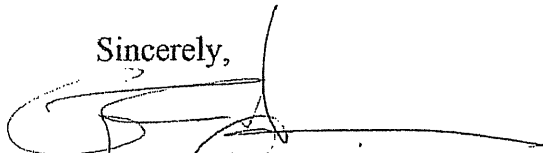

Dear Jim and Jackie,

I just wanted to take a moment and let you both know how much I am enjoying Fresh Air Spectrum that we place in my office a couple of months back. The difference in air quality and fragrance has been noticeably improved. In spite of the amount of traffic that flows through my office the atmosphere always seems to be "scrubbed" and fresh.

Because of the success of this item I am now enjoying the same features at home with the single unit we purchased for keeping the *entire* house fresh. No more room deodorizers, plug ins or fragrance candles, just fresh, clean smelling air all the time!

Thank you again for introducing us to these products.

Sincerely,

Guerin Johnson  
General Sales Manager  
Southpointe BMW

## Comfort Inn Airport East

**To:** Ernie Guillen  
**From:** Matthew Williams GM  
**Date:** January 11, 2007  
**Re:** Blaster Air Purifier

---

We have been very pleased with the Blaster air purifier. We have used it in our smoking rooms to eliminate the stale heavy odor that repetitive smoking causes. We noticed a substantial change in the odor and quality of the air those rooms. But I think the one thing that sold me was that we had a room we could not use due to the fact that a guest had a pet cheetah and this cheetah was not housebroken. The guest stayed with us for about a week and when they left the room smelled so badly we were unable to rent it. We tried many different tactics to try and get the smell out of the room without success. With just one week of the Blaster air purifier, the smell was completely eliminated. Because of this we decided to keep using the Blaster air purifiers in constant rotation in all our rooms.

Sincerely,

A handwritten signature in black ink, appearing to read "Matthew Williams", followed by a horizontal line.

Scott Gordon  
20 Durand Street  
Frewsburg, New York 14738

Dear Scott,

I just wanted to write to thank you for your assistance over the years with Alpine Living Air products.

We have had these units at the YMCA for over 8 years and as you know we find the units to be very beneficial for controlling odors in the cardiovascular room. We also use the units to keep some of the residential apartments in our building smelling clean.

On a personal note, I find these units excellent for regulating dog odors at my home. I also find the units have helped me very much in controlling my allergies.

I have had great success with taking the Lipo-Chromizyme and the E-3. Besides having a great deal more energy, I was really pleased to discover that my cholesterol had dropped 30 points and my triglycerides 150 points. Except for having switched to drinking water from your water purifier, I had not really changed anything else. So thanks for introducing me to these great products.

Sincerely,

Mark Eckendorf  
Executive Director

Dear Karl:

You probably won't believe this but have I got a story for you! Do you remember the "Flair" air purifier that I bought from you? About two weeks ago we had a skunk spray under our house and the horrid smell woke me up about 2 am. I thought that there was nothing that I could do so I tried to go back to sleep. Needless to say we didn't sleep much that night.

The next morning as I began to investigate what to do to get the smell out I decided to turn the "Flair" wide open and see if that would help. So we turned it all the way up and left the house for about 3 hours. When we returned the smell was totally gone.

Karl the "Flair" really works! Thanks Karl for all the clean AIR!

Sincerely,

John Louis Baker

631-586-1606

Dear William:

As you are aware, we manufacture cast Lifestone<sup>®</sup>, which is a polyester resin that has an extreme nuisance smell. Many people walk into our showroom and office, which is located in front of the factory and ask how we can stand working here. You can imagine this doesn't help the morale of my staff. We now have one of your Ecotech units in our showroom and it has really eliminated that nuisance smell.

I liked the product so much that I tested and purchased your big unit for my factory. This unit is worth every cent. It really brings the dust in the air right to the ground and out of the air. You are also a big fan of my wife as well. We have two very large German Shepherds at home. Did you ever smell wet dogs? Enough said! We have a unit in our house and it also is doing the job. We recently went on a vacation and had one of our neighbors watch the dogs. After we came home, she wanted to know why our house smelled so much better than her multi-animal house. You guessed it! She wants one of your units. So give me a call at work and I'll give you her telephone number.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Gerard Brown", written over a horizontal line.

Gerard Brown

Dec. 8, 2005

Mr. Michael Jackson, President  
EcoQuest International  
310 T. Elmer Cox, Dr.  
Greenville, TN 37743

Dear Mike:

My wife and I purchased a 10 year old house eight years ago here in Fairfield Glade, TN. The gentleman who owned the house was a "woodworker" and had a shop with all of the woodworking machines possible.

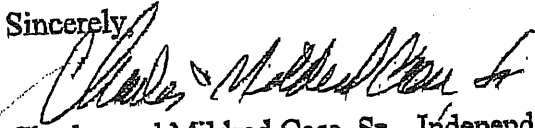

The smell of the stains, oils, vanishes and other products were the perfume in the air of this woodworking shop. In other words, it reeked with odors, although not obnoxious, or unpleasant.

For eight years we have put up with this aroma, and I wanted to change the atmosphere there. Recently we bought a PHX from EcoQuest International and I put it in the shop to try it out. You can imagine my surprise to return to the shop within about 2 -3 hours, and find most of the aroma gone. I could hardly believe it. Later, I returned again, to find the shop smelling perfectly clean and fresh. I didn't think this possible with such a small purifier, but it did the work.

We have had the PHX in the shop for about two months, and there has never been a nicer place to go and work, except outside in the fresh air.. We want to thank the engineers of EcoQuest International who designed this superb purifier. We can endorse the use of this air purifier for small areas that need to have the air cleaned.

We thought you'd like an evaluation of the PHX, a Great little machine!

Sincerely,

Charles and Mildred Case, Sr., Independent Business Owners for EcoQuest International

Mr. Dave Prox  
Eco Quest International  
3671 Williamson Avenue  
Brookhaven, Pa. 19015

PA

Dear Dave:

I want to thank you for introducing us to your line of air purification systems. The Fresh Air unit far exceeds my expectations.

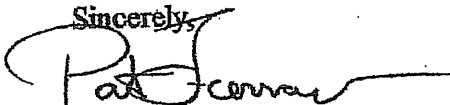

We have a 1993 Cadillac Allante in inventory that had a musty, cigarette odor. All our efforts to remove the smell were unsuccessful. However, after leaving your unit in the car for less than three hours, the smell was gone.

My 40' x 20' basement storage room has had a damp, musty odor for years. After two days, the unit you prescribed did the job. My wife could not believe how effective it was.

I told my brother about your product, and he wants to order one for his boat. He said he is tired of his wife burning candles to get rid of the odor inherent in most boats.

Thanks again for recommending such a remarkable product.

Sincerely,

  
Pat Ferraro

# SALON 1

EcoQuest International  
310 T. Elmer Cox Dr.  
Greeneville, TN 37743

12-05-2005

Dear EcoQuest:

I would like to take a moment and personally thank Scott Gordon, an independent representative of EcoQuest International, for introducing me to the Fresh Air Systems. I am a thirty year owner of a beauty salon. Over the years I have had numerous problems with odors because of perms, colors, gels, acrylic nail adhesives, nail polish and removers and I have tried several ways of eliminating these and other odors. Everything I tried before would not dissipate any of the odors, other products seemed to only cover them up, which eventually made matters much worse.

I am happy to have found the solution to our Salon's air quality problems with the EcoQuest Air Purification Systems. At first I was reluctant to give it a try because nothing else had ever worked, but once I did, I was convinced. The Fresh Air really does give a fresh, clean smell and feeling when you walk in. It's amazing that not any of my customers can tell we have given several perms in one day or that the nail department has performed many of its services.

My customers and employees have noticed that they are breathing fresher, cleaner air and they are no longer subjected to the chemicals and odors involved with our salon.

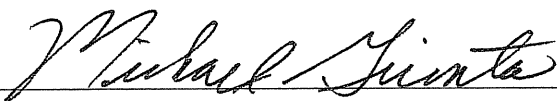

I am convinced that the Fresh Air really works and every Salon should have one. I have also purchased the Living Water and additional products for my home and continually encourage my family and friends to do the same.

Thank you so much for your great products.

Sincerely,

Salon 1

Michael Giunta, Owner

To Whom It May Concern:

Our home has a history of dealing with difficult odor that comes from some of the private rooms on the north side of the building. These rooms are typically used for isolation (e.g. c-diff, wound infections which would cause odors).

In the past, we have purchased Lysol, fragrance dispensers that all have masked the odor for a short period of time but it still continues to come back.

We are currently using Ecoquest purifier at the nurse's station and a small PHX unit in the room where the smell is located.

This product has assisted us in making our rooms odor free, as well as having a fresh cleaner air. This is also proven to be cost effective because we are not purchasing one-time usage of the fragrance dispensers.

We would highly recommend a free trial of this equipment from Pinnacle Group so that you too can experience this firsthand.

*IN*

To Whom It May Concern:

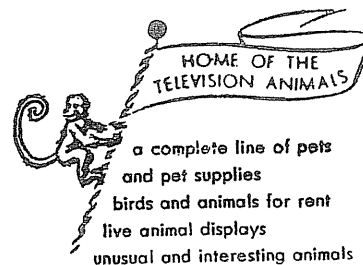

We purchased an Ozone "Blaster" from Spring Air & Water for our RV dealership's detailing department. Prior to the purchase we opted for a free 7-day trial. During that trial period we used the machine in the parts department to experiment with its ability to remove the odors released from various chemicals we stock. It not only eliminated these odors but also left the air noticeably fresher. Since the purchase of our machine we have used it in several coaches both new and pre-owned to remove odors from water damage, pets, smoke, and assorted other problems. In most cases it required less than 24 hours to achieve the desired results. In several units it did require up to 72 hours, but the results were indisputably remarkable. The products from Spring Air and Water not only have performed as advertised they have surpassed our expectations in every use. We would recommend their products to anyone that wants an odor and contaminant free environment.

Mike Hedrick  
Parts Manager

# Animal Kingdom INC.

2980 N. Milwaukee Ave. • Chicago, Illinois 60618 • Phone 227-4444

C.W. Schoenberg & Associates  
1107 S. Old Wilke Rd.  
Arlington Heights, Illinois 60005-2956

October 11, 2001

Dear Mr. Schoenberg,

As you know we have a special problem with odors. At any given time we house over 50 puppies, 30 to 40 kittens, a dozen ferrets (being related to skunks, ferrets have their own special odor problems) plus hundreds of birds, lizards, turtles, snakes, rats and mice. You might say it's a regular zoo around here.

Well, you were right!! The two "Flair" units we purchased from you have made a tremendous difference in the quality of our air here at the Animal Kingdom. We noticed a difference in just a couple of days. Over the past couple of weeks we especially notice a difference in the mornings when we enter the shop, we normally would get a build up of odors overnight. Now when we come in the air has a clean healthy smell.

We have been able to save money too! As part of our old odor control system we have a large 36" diameter exhaust fan that runs 10 minutes every hour literally bringing in a whole fresh air change. With the "Flair" units we have been able to greatly reduce the running time on the exhaust fan saving on heating and air-conditioning costs.

The units have performed as you suggested they would. Thank you from myself, my employees, my customers and all the critters.

Sincerely Yours,

*Robert A. Hoffmann*

Robert A. Hoffmann, President

COUNTRYSIDE VETERINARY CLINIC  
901 NORTH INDUSTRIAL STREET  
RED OAK, TEXAS 75154  
(972) 223 - 5641

March 5, 2001

To Whom It May Concern:

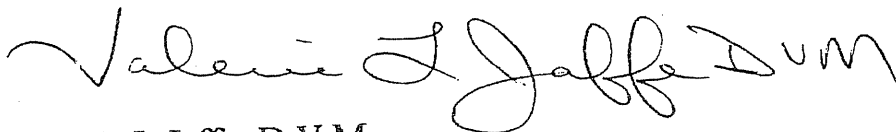

I purchased the Com Air Eagle 2500 unit through Ms. Elaine Thompson of EcoQuest in November of last year.

It has been an excellent investment for odor control around my veterinary clinic - also keeps the air fresh and ionized!

I was especially impressed with the unit on a couple of occasions, when we relied on it to remove such noxious odors as skunk spray, and odor from decomposing animal remains which were brought to us to be disposed of....

I would highly recommend this unit for air purification and odor control. Any other questions I would be happy to answer.

Sincerely yours,

EcoQuest

Dear Sir or Madam:

This air cleaning system was one of the best odor eliminating products that we have ever encountered. We would love to use the unit in our facility, if possible. When the daily scent of poopie diapers hit the air one shift of the unit and the room was as fresh as a garden. We appreciate the chance to experience such a great creation. Thank you so much.

Sincerely,

Rose Kelley  
Academy Director

To Whom It May Concern:

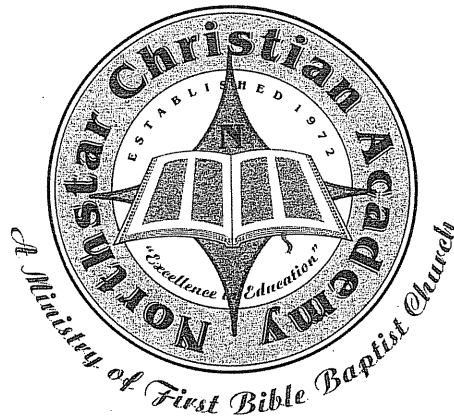

The White River Humane Society has been using the EcoQuest "FreshAir" Purification System that was loaned to us by Kelly Clarke for the past several weeks. The system has been great for our kennel area. We have noticed a significant reduction of feces smell in the mornings. We were also battling an outbreak of Kennel Cough throughout the population of dogs when we first acquired the system. Over the past several weeks the number of cases of Kennel Cough has been drastically reduced.

After testing the unit in our facility we felt that the "FreshAir" unit would offer us the most extensive and comprehensive benefits specific to our needs here at White River Humane Society. We are a Pro-Life Shelter and care deeply about the well-being, comfort, and health of our animals and we also strive to provide their new "adoptive parents" with pets in excellent healthy condition and with respect to other pets who may already live in their home.

We would highly recommend the FreshAir purification system to other shelters, veterinarians, and professionals to whom it is of prime importance to provide for the animals in their care the optimum advantages and benefits obtainable through having the cleanest, healthiest - and happiest! - living environment possible.

Sincerely,

Melissa Kusturin

Henrietta, NY 14467

I just wanted to inform you of the effectiveness your XL-15 air purifier against bacteria and mold in a high school laboratory experiment. I had a purifier running in my classroom since the beginning of the school year because of the chemicals, biologicals and odors from my classes and labs. Since I spent many hours in that room, I was concerned for my students and my own personal health and potential exposures to chemicals.

As a high school biology teacher, I usually have a major laboratory project involving obtaining and growing bacteria from several places throughout our school. For the bacteria experiment, I completely forgot to turn the purifier off prior to sending my students out with sterile inoculating loops for their bacterial samples. When the students returned to transfer their bacteria onto sterile agar plates to grow cultures, these loops and plates were exposed to the fresh air from your purifier for only a few seconds. The 28 plates were then sealed and placed in an incubator for several days. Each day, the students record their observations about the number and size of bacterial and mold colonies growing in the cultures. After a week, only a couple plates showed just a very few colonies. Normally, all plates have a generous number of different bacterial colonies. I then suspected the purifier since it was the only thing different in the classroom than in previous years. I turned it off on Friday. Over the next week, my students all started over again with fresh plates. This time, in the absence of the purifier's fresh air, all plates grew bacteria and molds as expected. I kept the purifier off until all students had finished.

I was very surprised at how well the XL-15 performed because the bacterial plates were only opened for approximately 10-15 seconds. However, this brief amount of time was apparently sufficiently long enough to kill off nearly all bacteria and molds. This purifier has definitely made an improvement in the air quality in my classroom. Thank you.

Sincerely,

David H. Miller  
Biology, Chemistry and Environmental Science Instructor

Re: EcoQuest Air Purifiers

To whom it may concern:

Mr. Grove kindly brought in three air purifiers to our 6000 square feet woodworking shop to see if he could control the odors and dust in our shop. He brought in a COM AIR Ecotech M11500B a Blaster SAN Air 08 and a Flair living air purifier. To our astonishment, within less than 24 hours, we could no longer see dust floating in the air through the light coming in through the cracks. The odors were significantly less and we could smell the difference. He left the purifiers in our shop for 2 weeks without charge to make sure they would work well for us. After the 2 weeks, we purchased all three purifiers and six of the eight employees purchased a Flair for their home. He returned the favor to our employees by letting them use the purifiers in their home before purchasing. The air purifiers really work and have changed the quality of our life at work.

Thank you,

*Sherree Martin*

Ted and Chris Belz  
Clean Air  
235 W. Brandon Blvd. Suite 251  
Brandon, FL 33511

Dear Ted and Chris:

I wanted to write a testimonial letter so that you can let my fellow Realtors know just how helpful the Clean Air machine has been. I purchased it to address a chronic odor problem in my own home. After living here for 5 years, I still had a stale smoke odor from the prior owners. I have spent hundreds of dollars on plug-ins, sprays, and candles and could still smell smoke, especially when the air conditioner would begin running. I am pleased to report that the smell no longer exists. I have also noticed that my headaches are fewer, and I can smell the "rain fresh" clean air from the moment I open the garage door when I return home.

I have used my Clean Air machine on quite a few of my listings for some pretty offensive pet and smoke odors. Most recently it has been put into service to rid vacant homes of the musty smell from having 20 inches of rain in a single week!

One of my favorite features of the Clean Air machine is that it works where it doesn't get in the way. I recently tripped over the cord of another brand of "air purifier" while showing a house! I told the owners about "Clean Air" and how I almost forget that it's there! That's especially important to me as I have a toddler running around the house!

Sincerely,

Candy Mausser

To Whom It May Concern:

Our nightmare began on the evening of October 25, 2000 when a skunk crawled into our basement through an open bulkhead door. After trying unsuccessfully to lure him out, we decide to leave him alone until morning when we could contact the animal control officer. Well, at 7:30 am he decided to spray. The smell was unbearable, it brought tears to your eyes.

The animal control officer arrived and within a few minutes had the skunk removed. Now came the problem of how to rid our house of this terrible smell. She gave me the name of Marsha Levine. I called her and she was at our house within fifteen minutes with an odor control spray and two air purification machines. She sprayed the basement and set up a commercial machine in the basement and a residential one upstairs. The smell was so bad we could not even sleep at home that night.

We ran the machines for four days with only a slight trace of skunk remaining. We left on vacation for a week and returned to find we could still smell the skunk. Marsha brought back one of her machines and we ran that for three more days. The smell completely disappeared.

It has been almost four months since that night and thanks to Marsha and her "miracle machines" there is not a trace of skunk odor remaining. Not even on rainy days! I believe this was the test of all tests for these machines! I hate to think what would have happened if that smell would have embedded itself into the cement floor or foundation.

Thanks again, Marsha!

Dear EcoQuest,

My husband, Bob, and I are smokers, but we really like to have nice things in our home. We have completely remodeled our entire house, including new paint, new carpet, new window coverings and new furniture. We were really pleased with the way it looked, it was beautiful! BUT...when we came home from work in the evening and opened the door, our beautiful house still smelled like a bar. I complained to my mom & dad, who had recently become EcoQuest dealers, about how much we had wasted on remodeling only to have a house that smelled so bad. Of course the first thing mom suggested was that we quit smoking, or at least to smoke outside. I said "Those two suggestions are not options". So she said, "Let us set you up with one of our purifiers for an evaluation." When I told her we weren't buying anything else, she said "All you have to do is write a testimonial after the trial period is over if you think it does the job, and we will come and pick it up". Well, I was very skeptical that any little machine could take care of our problem, but I said "Okay".

Well to make a long story short...at the end of the trial period...I not only agreed to write a testimonial, but we also bought the purifier!! Now when we come home after work, our house no longer smells like a bar...it smells as beautiful as it looks. AND...we can still smoke in the house!!

My husband had only one complaint...when I cooked a holiday meal and baked cookies and pies, he couldn't smell the delicious aromas of the holidays. Now that was alright with me, because that meant you couldn't smell sauerkraut or cabbage cooking either. Anyway, Mom said just turn the purifier down or off while you are cooking something that smells good, and then turn it back on afterward. Now we are both happy.

Thank you EcoQuest!

*Becky Sayre*

Becky & Bob Sayre  
Zanesville, Ohio 43701

The favorite part of my day for the past 20 years has been lighting up a good cigar on the way home. As would be expected, my car has the aroma of a gentleman's club.

Not everyone agrees that this is particularly pleasant. In fact, I've even had people tell me they'd rather not ride in my car. But since I wasn't planning to give up cigars, I figured there was nothing I could do about the smell.

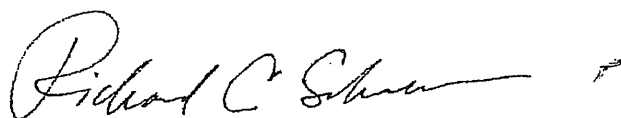

I was wrong. When a friend told me about his success removing odors in his home with Fresh Air, I shared my story. No way any machine, I said, can really remove—and not just mask—the cigar odor that had permeated the leather, headliner and rugs in my car.

He was so confident it would work, I agreed to put it to the test. While the football game was on—roughly 4 hours—I ran the Fresh Air unit on full strength (purifier and sanitizer) inside my car, parked inside my garage. After the game, I decided to be extra fair and give the machine another 2 hours to work its magic.

The next morning, I cautiously popped my head into the car. To my amazement, there was not even a trace of cigar smell—just a clean, fresh scent. It smelled so great, in fact, that I even considered giving up cigars.

Of course, I didn't. But now I have an easy way to return my vehicle to like-new condition, any time I want. Even better, I have discovered that if I run my Fresh Air To Go unit in the car for a few minutes every day, I can keep that fresh, clean smell all the time. As a result, even my mother-in-law is happy to ride in our car when we go on long trips.

My hat goes off to the people at EcoQuest. This is a product that really does what it says it will.

ECOQUEST INTERNATIONAL

EAST GLACIER PARK, MT. 59434

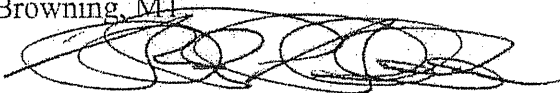

Charley,

I wanted to let you know again how impressed I am by the Ecoquest line of products. I certainly want to praise the "AT Breeze" unit. The difference it has made in my home environment is remarkable. I have had pets for many, many years. The knowledge that the air in my home is now free of pet hair and dander as well as dust and molds is significant at a time when we have all become more health conscious.

I would also like to praise the Ecoquest vitamin supplements. I can feel the quality of the product and will certainly endorse them for anyone who is conscious of their health and the health of their family. I don't believe that there is a better product on the market.

Thanks again, Charley!

Dear EcoQuest,

A friend and customer of our bar/grill recommended we try one of your air purifiers for the problem of smoke on our busiest evenings. Our place is small and intimate and the smoke becomes rather intense on the weekend evenings.

When our dealers, Bill & Ellen Barks brought in a Fresh Air for a risk-free, no obligation evaluation for 5-7 days; I was certain it would not do the job. A little stereo speaker sized box to take care of all that smoke....NO WAY!! And we were concerned not only with the smoke, but also with odors from the restrooms.

After they set it up and explained how to operate the unit by remote control; they asked us to set the sanitizer feature for 8 hours and prop open the bathroom doors as we closed up at night. They told us it would automatically go back to our desired setting when the 8 hours were up.

We noticed an improvement in the air the same day and when we came in the next day after the sanitizer was used during the night, we were amazed at the difference in the freshness of the air. So now we set it according to the amount of smoke during the day and use the sanitizer every night. Even our smoking customers have had nice comments about the air. Needless to say, we bought the unit at the end of the evaluation.

Thank you EcoQuest, for solving our problem.

---

Dear Cliff,

Thank you so much for introducing the Fresh Air for life system to my husband and myself. We appreciate the opportunity to have the "Thunderstorm in a box" in our home on a trial basis. My husband can now sleep without snoring. Which to him is a great relief.

For me, Two years ago I broke my neck in an industrial accident. Since that time I have had all kinds of sleeping disorders. With this system I have had great relief in this area. I wake up feeling refreshed and I don't have the congested feeling as I had experienced before we tested the system. The first day we brought the unit into the house, I noticed a big difference in the odors that are always present. Because my home is an older manufactured Home, it has some musty smells. We also own Two cats, so you know the smells that they can have. All these odors are gone and my home smells like it does out side after a spring shower. These are amazing results in such a short time (4 days).

I will highly recommend this product to all my friends and family. I would also recommend that they all try the field tests. They are easy to do and you can get a quick idea on how the system will work for all kinds of odors.

Sincerely,

Steve and Vicki Spurr

Dear John and Amy,

The Butler/Swayne Team of Prudential Georgia Realty thank you and Jeanne Cooper for loaning the EcoQuest unit to our office and lending your expertise to help this team with a client's home that had very strong cooking aromas. Your level of knowledge and information about the product was impressive, that winning combination eliminated the strong level of aromas in less than two weeks! The indoor air is fresh and clean-smelling!

You were delightful to work with, responding immediately, very flexible and accommodating in scheduling appointments to review progress, and made adjustments when needed to get the optimum results targeted.

We will definitely be sharing our success with other agents and perhaps our testimonial will help to provide EcoQuest further business with Prudential agents! Thank you.

Sincerely,

Marilyn Truax,

I just wanted to drop you a note to let you know how much we are appreciating our new Breeze! What a fantastic difference it has made in our home. In the middle of the winter, with an old oil burning furnace, 3 birds, a cat, a dog and with the windows closed, the air quality in our house was less than what the national air standards for air quality could allow .

This last weekend my father-in-law was sitting in the living room and said, "John, I can tell you finally got that oil leak fixed!" We don't have a leak, it is just that this old furnace smells. The Breeze completely removed the odor.

Every house has its particular smells. After you live in it awhile you just accept it and don't even notice. Well, we were beginning to tolerate too much: The kitty box in the basement, our son's responsibility, gets neglected much too long. The dog is a puppy -- need I say anymore? The birds are wonderful and we keep them clean but they just naturally have a lot of dander. Last night when I walked into the house I thought, "Who left the window open? our heating bill is going to be out of sight this month!" But the window wasn't left open, I just happened to be stepping inside for a breath of fresh air thanks to our new Breeze.

I guess, what I am trying to say is; Thanks Marilyn for introducing us to the Breeze. We're breathing much better now thanks to you taking the time to introduce us to your little machine.

John Tanner

December 21, 2000

Dear Prospective Customer of Marsha Levine,

When we opened our acupuncture clinic in June of 2000, we were searching for a way to eliminate the moxa smoke without resorting to costly ventilation reconstruction in this historic building. Marsha suggested that we try the *Living Air Classic* in our 1000 sq. ft. office. We are delighted! Not only does the *Living Air Classic* quickly eliminate moxa smoke and odor, it keeps the air incredibly fresh in this old (historic) building. Our clients say they, "feel better," just by coming into the clinic!

Please call us if you want further recommendation.

Sincerely,

David Teixeira, RN, Lic. Ac.

905 5<sup>th</sup> St.

Clay Center, Ks. 67432

October 22, 2002

Dear Gail,

I wanted to tell you that you were right! When you told me that once I tried the XL-Classic in my produce room for thirty days, I would be pleased. The smell in my back room was nasty, with rotten fruit and flies everywhere. You put that machine in, and in just a short time there was no smell, and less rotten produce and no flies. The smell in the back room now is clean and fresh. My Produce Manager loves it. We put it in our cooler for two weeks, and the produce lasted much longer. We have had a lot less waste now.

I also enjoy my machine in my home. I can cook anything I want at home and not smell the whole house up. I have 2 cats also, and everyone who comes in can't smell them either. When people come into our home they say it always smells good.

I would also like to say that the Living Water unit works great. We have had it in our home now for 2 years, and would never be without one. We have people come in, and taste the tap water, and then taste the filtered water, and they know the difference. It was a great investment! I'll be sure to tell all my friends and family.

Thank you.

Ray Turner, Manager  
Kier's Thriftway

**RE: ALPINE AIR PURIFICATION SYSTEM**

Dear Marsha:

I am writing to share with you my experiences with the Alpine Air Purification System, which I purchased from you several months ago.

The fact that I am pleased, is an understatement. I have had several challenging circumstances by which to test the System. These included severe mold/mildew odors, problematic pet odors and even heavy cigarette smoke damage. Although initially skeptical, I happily report that in each of these cases, the Alpine Air Purification System proved to be a winner!

As a real estate Broker, marketing my properties is very important to me. My Sellers and I are equally concerned about their homes being in their best possible condition. Sometimes, circumstances beyond our control can hinder that, like a damp basement, for instance. Having a valuable tool like the Alpine Air Purification System, however, takes the worry out of such a situation. The results are quick, easy and absolutely amazing.

The decision to purchase an Alpine Air Purification System is one of the smartest I have ever made. I look forward to many years of using this fine machine.

Thank you very much for your presentation, suggestions and service.

Very truly yours,

Anne M. Whiting  
President

Dear Ms. Koopmann:

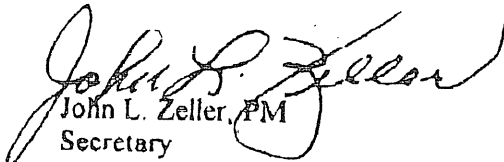

On April 2, 2001, we purchased and installed in our banquet hall a 5000 COM-AIR air purification unit. Our members would like to thank you for inviting us to your seminar that was held at the Ramada Plaza Hotel where you introduced us to this fine machine.

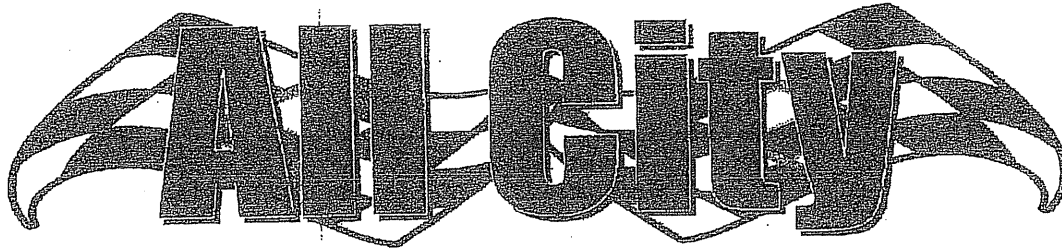

Over a year ago, we started having bingo on the first, third and fifth Wednesdays of every month. Many of the players smoke and by the end of the session, our eyes burned and smarted, clothing smelled of smoke and you could see a haze of smoke across the hall.

After the installation of Eagle 5000, we noticed that the smoke haze was eliminated, our eyes did not burn and the smoke odor was eliminated from our clothing and the hall.

Thank you for your fine service. On behalf of our members and bingo players, thank you for returning to us cleaner air.

Sincerely,

  
John L. Zeller, PM  
Secretary

June 9, 2006

Dear Mr. Melton:

As Lynne Chipman's piano technician, I would like to thank you for the terrific job you did in removing the smoke odor from her piano. The first time she called me to schedule a tuning appointment she asked how to remove the smell from her newly-acquired used piano. Thankfully, I was already aware that you did very fine work in odor removal, so I was able to give her your contact information. By having an answer to her question right away, I appeared more professional and knowledgeable, which helps my business image as well. The real "plus" for me is that I can give your name out to my customers because I can be sure that you will do good work. The piano smells "fresh as a daisy", and Lynne was thrilled. Thanks again for being a resource for me and for my customers!

Sincerely,

Scott A. Helms

To Whom It May Concern:

I recently purchased the Ecoquest "Ozone Blaster" for our detail department from Ken Jones and Air and Water Technologies. Originally I had planned to use this machine for trade-ins, which had been smoked in, or vehicles that had that "lived in" smell. However, I have been so impressed with the performance and ease of use of the Blaster that we now use it in every car we trade for. I have also had some success already in selling this service in our lane. I see no reason why I should not be able to recoup the purchase price in the first six months.

Anyone who is looking for an inexpensive way to give his or her vehicles that little something extra needs to look hard at the "Ozone Blaster".

Sincerely,

Brent Waggoner  
Fixed Operations Director  
Thoroughbred Chevrolet

This testimonial is received from a user of one of Eco Quest's products and contains their personal story as to how Eco Quest's products have worked for them. Eco Quest does not claim or represent that their products will be as successful for you in your environment. Eco Quest strongly recommends that each person try the product and determine for themselves how well it works in their environment.

K4

October 24, 2005

My Dental Practice is in a two story office building. In the building there is a third floor considered a basement. The basement does not leak but is slightly damp. There has always been a musty smell in the basement. I purchased a Breeze AT air purifier from Ken Jones. He installed it and immediately we noticed a positive change. After several days the musty damp smell was completely gone. This freshness even permeates up to the first floor. I was so pleased with the result that I purchased a similar unit for my home. I highly recommend the Breeze AT air freshener for odor removal and air purification.

Sincerely,

  
Garnett C. Brown III, D.M.D.

IL

December 6, 2005

To Whom It May Concern:

I am currently working with a company who manages 15 long term care facilities in 3 states. One of the facilities in southeastern Indiana is 105 certified beds with a 24-bed secured dementia care unit. The facility has no central heating or air conditioning system, but functions with individual room units. Thus, there is very little air circulation in the hallways causing odors to "remain in place" for periods of time.

In October 2005, two Ecoquest purifiers were placed in this unit with truly remarkable results. Subsequently, units have been placed throughout the facility, again, with very positive results. The facility is virtually odor free as well as having a fresh clean smell. Even the State Surveyors who visited were impressed!

Cleaning and maintenance of the purifier units is very easy for our staff. It is a very cost effective system, since there is no need for short-term plug-in fragrance dispensers.

I would highly recommend this equipment and encourage others to participate in a free trial so you can evaluate this yourself.

September 2004

Dear Dave,

8.20.04

I just wanted to drop you a line of recommendation for your Eco Quest Blaster. Not long ago I had a gallon of milk roll off my car seat and break open on the passenger side carpet. I have never smelled something so bad in my entire life. I tried shop vacs, sprays and even those annoying things that hang from your rear-view mirror. Nothing helped and stench of sour milk was enough to make me sick.

8.20.04

I have to admit that I was a little skeptical of your idea of an Eco Quest Blaster taking the smell out. However, being desperate I was willing to try anything. Per your instruction I used an extension cord and plugged the Blaster in and left it running in my van overnight. The next morning it definitely smelled better but the milk smell was not ready to give up. I put the Blaster in for a second night. The next morning the smell was completely gone! Here is the best part, the Blaster did not just cover it up it eliminated it. It has been several months now and the smell has not returned. I am a believer in the Blaster.

8.20.04

Thanks again for your advice and help. Now, does Eco Quest make a tiny Blaster that would fit in my sons diaper...?

Sincerely,

Eric J. Segool

### The Fresh Air Purifier by EcoQuest

My family and I tested the Fresh Air purifier for about a week. We have six animals: 2 dogs and 4 cats (with 4 litter pans!). One of the first things I noticed after about 24 hours of continuous use, was the smell of the litter pans, or rather, the lack of smell from the litter pans. Normally, I can smell them when I walk in the door, unless they have JUST been cleaned. While using the Fresh Air purifier, the air smelled fresh and clean, even if we hadn't just cleaned the litter pans!

I was cooking dinner one night (with onions) and decided to move the Fresh Air into my daughter's room. When I put it in her room, I closed the door to "sanitize" the room. After stepping back into the hallway, the smell of onions and cooking food hit me. I hadn't noticed the smell at all when the Fresh Air was in the kitchen, because it was "eating up" the smells. Not that I mind the smell of cooking food, but smells like onions or garlic can linger for days under normal circumstances. Not so with the Fresh Air!

Another very interesting thing I noticed was in the bathroom (not what you might think!). I like to reuse bath towels 2 or 3 times to conserve energy. More often than not, the portion of towel that hangs on the hook to dry, smells like mildew the next day. I guess it can't get dry where it sits against the towel hook. With the Fresh Air purifier the towels didn't smell funny anymore! Once our test period was over, I noticed right away that the towels were mildewing again.

My husband and I tried some of the Quick n' Fun tests. We were pleasantly surprised that an old pair of sneakers smelled like brand new rubber after being "sanitized". What an amazing machine! I really enjoyed testing it in our home, but didn't realize how much until we no longer had it! I'd recommend this machine to any household. If it can pass the test of a family with 6 pets, it can pass anything!

BY CHOICE HOTELS

December 19, 2005

To Whom It May Concern:

This letter is to recommend James Lynn and the Ecoquest International PHX Air unit. I have looked for years for a unit that will continuously clean the air in smoking rooms at my hotel. Up until now I have never found equipment or an air cleaner that will work like the PHX. I have tried many different things and nothing works like the PHX unit, just plug it in, turn it on and forget it. It works like a dream; the results are almost instant and totally consistent and reliable. If you are looking for something to improve air quality in your hotel rooms, this is the unit, bar none.

James Lynn is an excellent person to deal with, he delivers what he promises and will assist with any training/technical issues that you might have.

I highly recommend this unit, it is an ease to operate and the results provide it.

Sincerely,

A handwritten signature in cursive script, appearing to read "Kent Miller".

# Curves

To Whom It May Concern:

My name is Guadalupe Abbud and I a co-owner of the Vista Hill Curves club located at 1188 Yarbrough, st H.

Curves is a gym for women and I can say that 80% of the membership do indeed, appreciate the clean air that the "Air Fresh" purifier produces.

I have been impressed by its ability to actually purify the air. My club smells and feels clean, sanitized and pure.

I have been recommending the "Air Fresh" purifier to other Curves owners as my members definitely felt the change from the first day that Mr. Ernie Guillen installed the air purifier.

I am very thankful to Mr. Guillen for allowing me to try the air purifier for a couple of months. My decision to purchase it was based on the fact that I had such a positive response from my members.

Feel free to contact me at 241-2857 should you have any questions.

Sincerely,

Guadalupe Abbud  
Curves co-owner
