To whom it may concern,

I wanted to share my experience with having the Fresh Air Purifier in our home for over a year now.

Prior to August 2006, I suffered severe breathing difficulties at night, since my nasal passages would clog up and I couldn't breathe.

Since then, we have purchased a Fresh Air machine and used the Away Mode to sanitize our bathroom, our mattress and our pillows and I have not had a problem breathing since.

This is an outstanding product that benefits people, and we hope that it never gets banned from California. Thanks for listening to our plea.
