

Diane Bailey

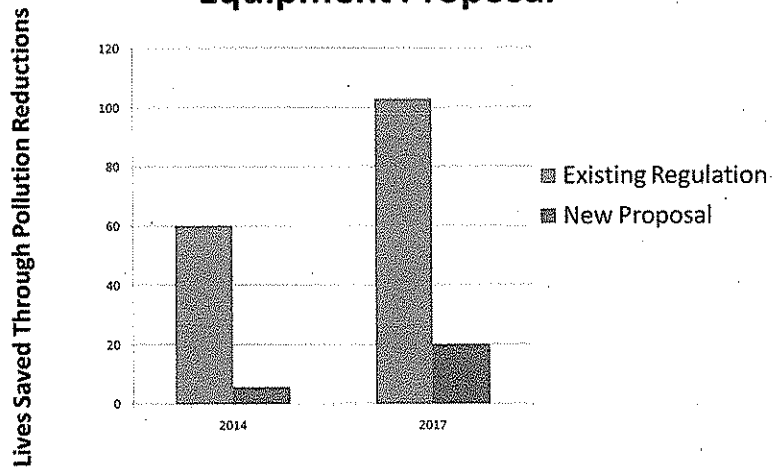

Balancing Economic Needs with Public Health

- Recognize economic relief is needed, but public health protections must remain a priority.
- Concern for the loss of health benefits in the near term: The recession reduced activity but emissions from trucking remain nearly as high as pre-recession forecasts.
- Over the next few years, a focus on cleaning up the oldest trucks can provide meaningful improvements in the most impacted areas.

Loss of Benefits with New Truck and Bus Proposal

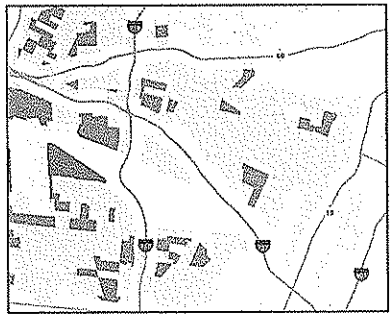

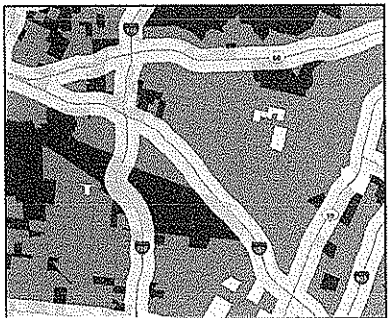

Loss of Benefits with New Off-Road Equipment Proposal

Who is impacted most?

Families living near high traffic roadways

Freeway-impacted Communities in Commerce, CA

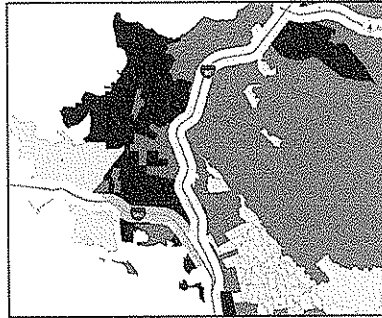

Legend
