July 25, 2007

We are in receipt of your recent card and have received previous cards.

The previous cards stated over 50 Horsepower units. Now you say over 25 horsepower.

We have a 49 horsepower Deutz engine on a trencher that we use occasionally. We can not afford the loss of this unit.

I operate it myself, as do employees and sons, it does not pollute. It does not emit fumes like a diesel bus, it is clean enough to operate all day with out any side effects from emissions.

The government is always making new laws. They usually exempt themselves. They are driving business, friends and customers out of California. This would not change air pollution. Be more realistic. The news reports show air pollution in Sacramento to be more than twice the level of Stockton. Does this mean you have twice as many of these engines running. I don't think so!..

Please be real, this is not the answer.

Sincerely,

A handwritten signature in cursive script that reads "Larry Moorman". The signature is written in black ink and is positioned above the typed name and title.

Larry Moorman
President
Moorman's Water Systems Inc.
