

IN-USE OFF-ROAD DIESEL VEHICLE REGULATION

This page updated October 18, 2007.

On July 26, 2007, the Air Resources Board (ARB) adopted a regulation to reduce diesel particulate matter (PM) and oxides of nitrogen (NOx) emissions from in-use (existing) off-road heavy-duty diesel vehicles in California. Such vehicles are used in construction, mining, and industrial operations. For more information you can call the diesel vehicle information hot line at (866) 6-DIESEL or (866) 634-3735.

If you are seeking information on the ARB's program for **new** off-road mobile equipment instead of in-use PM control measures, please [Go there](#). If you are seeking information on ARB's program for off-road large spark-ignition equipment (e.g., forklifts), please [Go there](#).

- ◆ Notice of Extended Deliberations on the Proposed Regulation for In-Use Off-Road Diesel Vehicles.

As previously announced, the Air Resources Board (the Board or ARB) will consider the proposed regulation for in-use off-road diesel vehicles on Friday, May 25, 2007 at the Marriott Hotel's Grand Ballroom in Del Mar, California. A hearing will begin at 8:00 a.m. and conclude no later than 5:00 p.m. All persons wishing to testify on this matter will be afforded the customary three minutes to make their remarks. In addition, written comments of any length may be submitted for the Board's consideration.

To ensure that all potential witnesses can be accommodated and to give the Board sufficient time to weigh and consider all oral and written testimony it receives on this matter, the record will remain open after May 25, 2007 and the Board's final deliberations will be carried over to ARB's regularly scheduled meeting on July 26, 2007 in Sacramento. At that time, the Board will resume its consideration of the proposed regulation for in-use off-road diesel vehicles and make its final decision.
