RE: In-Use Off-Road Diesel Vehicle Proposed Regulation

Dear Dr Sawyer,

Please be advised that we are a small Equipment Rental Center with operations located in the State of California. We are concerned as to the In-Use Off-Road Diesel Vehicle Proposed Regulation and particularly as it relates to 25 horsepower and greater engines operating in California. The proposed regulation will have a serious financial impact upon our small business. We therefore request that you consider as an alternative a threshold of 50 horsepower and greater engines. We believe the 50 horsepower threshold to be more readily attainable by small business. Additionally, we believe the financial and administrative impact upon CAPCOA will be reduced from the elimination of the 25 to 50 horsepower equipment from the inventory. Thank you.

Sincerely,

SUNSTATE EQUIPMENT CO.

Don Cash
Risk Manager
