Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, **speed up this process to a 10-year phaseout.**
2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to **phase out new systems that use hydrocarbon solvents.**
3. To provide immediate protection to those who need it most, **require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.**

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Dyuki Rubi
1615 W. 4th St.
MADERA, CA 93637

Sincerely,

When we put toxic chemicals in our environment,
it becomes part of ourselves. A 10 year phase-
out is unacceptable. But it is better than a 15
year alternative. Do what is right for all of
us.

Alex Lozano

Estimado Dr. Sawyer y Miembros de la Mesa Directiva:

Como consumidor, me preocupa mucho que las tintorerías continúen utilizando el químico tóxico percloroetileno (perc). Por tal motivo quiero agradecer que Usted y los otros miembros hayan votado para prohibir el uso de este carcinógeno. Su decisión ayudara a proteger a los empleados de las tintorerías, sus clientes y vecinos.

Les estoy escribiendo para pedir que adopte las siguientes alternativas, las cuales reforzarán aun más la propuesta para eliminar el perc que se utiliza en las tintorerías:

1. La comunidad no debería continuar siendo expuesta al percloroetileno. En vez de alargar el proceso durante 15 años, la eliminación del perc solo debería tomar 10 años.
2. Una de las alternativas a la técnica que utiliza el perc para limpiar la ropa causa smog. Es por eso que le pido que también prohíba el uso de sistemas a base de solventes de **hidrocarbano**.
3. Para proveer protección inmediata a aquellos que mas la necesitan, es importante que **para el año 2010 ya se haya prohibido el perc en tintorerías a menos de 300 pies de distancia de zonas residenciales, escuelas, centros médicos, u otros receptores sensitivos.**

Por favor continúen protegiendo a los californianos de los peligros que el perc representa para la salud pública al adoptar estas propuestas.

Muchas gracias.

Sinceramente,

latino**bambino**73@**yahoo**.com

1. La comunidad no debería continuar siendo expuesta al percloroetileno. En vez de alargar el proceso durante 15 años, la eliminación del perc solo debería tomar 10 años.
2. Una de las alternativas a la técnica que utiliza el perc para limpiar la ropa causa smog. Es por eso que le pido que también prohíba el uso de sistemas a base de solventes de **hidrocarbano**.
3. Para proveer protección inmediata a aquellos que mas la necesitan, es importante que **para el año 2010 ya se haya prohibido el perc en tintorerías a menos de 300 pies de distancia de zonas residenciales, escuelas, centros médicos, u otros receptores sensitivos.**

Por favor continúen protegiendo a los californianos de los peligros que el perc representa para la salud pública al adoptar estas propuestas.

Muchas gracias.

Sinceramente,

ernestine.mansour@lausd.net

Estimado Dr. Sawyer y Miembros de la Mesa Directiva:

Como consumidor, me preocupa mucho que las tintorerías continúen utilizando el químico toxico percloroetileno (perc). Por tal motivo quiero agradecer que Usted y los otros miembros hayan votado para prohibir el uso de este carcinógeno. Su decisión ayudara a proteger a los empleados de las tintorerías, sus clientes y vecinos.

Les estoy escribiendo para pedir que adopte las siguientes alternativas, las cuales reforzarán aun más la propuesta para eliminar el perc que se utiliza en las tintorerías:

1. La comunidad no debería continuar siendo expuesta al percloroetileno. En vez de alargar el proceso durante 15 años, la eliminación del perc solo debería tomar 10 años.
2. Una de las alternativas a la técnica que utiliza el perc para limpiar la ropa causa smog. Es por eso que le pido que también prohíba el uso de sistemas a base de solventes de **hidrocarbano**.
3. Para proveer protección inmediata a aquellos que mas la necesitan, es importante que **para el año 2010 ya se haya prohibido el perc en tintorerías a menos de 300 pies de distancia de zonas residenciales, escuelas, centros médicos, u otros receptores sensitivos.**

Por favor continúen protegiendo a los californianos de los peligros que el perc representa para la salud pública al adoptar estas propuestas.

Muchas gracias.
