

# It Takes More Than A Car Wash To Get A Clean Car

**SUPPORT THE CLEAN CAR DISCOUNT (FEEBATES)**

Dear Air Resources Board Members,

As you know, transportation is our state's number one source of the pollution that causes global warming.

The **California Clean Car Discount** (also known as the "feebates" program) will be a great complement to California's existing landmark global warming standards for vehicles—the Pavley standards—by engaging consumers in an innovative fashion that Consumer Action called "a creative approach to vehicle emission reductions that protects consumer choice."

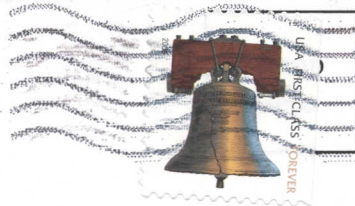

**Please make the California Clean Car Discount a reality.**

Sincerely
