

Dear Mary Nichols,

Thank you for having the
courage to create the Climate Change
Scoping Plan.

To strengthen your plan, we
ask you to limit the use of
offsets to a very small
fraction of the cap and trade
program. The current state
of the environment demands
bold and deeper cuts so
that we do not reach the tipping
point with regards to climate
change. Offsets delay the
transition to a clean energy
economy. We ask that you find
the courage to take immediate
action to stabilize the climate
by greatly reducing the offsets
from your revolutionary plan.
Thank you, Hannah Borthwick-Green Sangre
