

# Cap & Dividend Petition: CA's Global Warming Solution Act (AB 32)

As a citizen of California, I recognize the urgent need for action to address global climate change. We need to stop global warming, help create a future where the climate is stable and inspire the U.S. and the world with a solution that works.

Let the California Air Resources Board know that you support a Cap-and-Dividend approach to implementing AB 32, where polluters pay, clean energy becomes competitive, and dividends protect the poor and middle-income families from rising energy prices.

Please write legibly. ✍ Thank you.

## Cap & Dividend Petition: CA's Global Warming Solution Act (AB 32)

As a citizen of California, I recognize the urgent need for action to address global climate change. We need to stop global warming, help create a future where the climate is stable and inspire the U.S. and the world with a solution that works.

Let the California Air Resources Board know that you support a Cap-and-Dividend approach to implementing AB 32, where polluters pay, clean energy becomes competitive, and dividends protect the poor and middle-income families from rising energy prices.

Please write legibly. ✍ Thank you.
