Dear CARB,

You must create the strictest standards & regulations regarding mobile pollution sources.

AQMD Plan must be adopted, & I believe, go even further.

Who in Los Angeles County hasn't been sick from air pollution?

Everyone here knows someone who's had cancer,

-2-

I was diagnosed at age 24. I know of many women who were diagnosed with lung cancer & never smoked.

A 52 year old girlfriend recently had a stroke - she is thin, works out daily, never smoked. 2 girlfriends got brain tumors - all live within 1/2 mile of a freeway.

The ill health effects

of smog are painful,
costly, & we must
create laws & force
people & companies
to change their ways,
creating new technologies
& operational practices.

Please regulate. Create
necessary initiatives &
laws, including finding
ways to get rid of diesel
trucks, buses & ships.

You have an important

-4-

responsibility. Exercise it
at the strictest levels.

Failure to ~~do~~ so ... well,
do you want cancer or
a premature heart
attack?

You have the power.

Use it for the
people & to make
business ever more creative
in finding solutions.

Best regards,
Donna Barrett
