

Mariol Barajas
07-77

June 23, 2006

Dear CARB,

My name is Mariol Barajas project coordinator for a community driven project. Community Partners Council (CPC).

Community Partners Council is dedicated to work on improving the health of children and their families.

Our members are extremely low income families who have no or very little access to adequate medical care. They continuously face economic hardships along with various health effects caused by the Long Beach port, trucks and 710 freeway.

Our families are not concerned about fireplaces releasing pollutants but are most concerned with the lack of control over mobile sources.

I'm here today to please take action today on implementing the AQMP by strongly focusing on controlling the mobile sources. This will alleviate our children's asthma our mother's cancer →

and other deases ending the lives
of our brotheis and sisters

Please adopt higher standards
instead of allowing short and
deadly strategies.

Respectfully

Mariol Barajas
Project Coordonator
