

Rep Kucinich Rewrites HR 2977 - 'Chemtrails' Disappear

By Lorie Kramer, seektress@evl.net, January 27, 2002

The "Space Preservation Act of 2001" originally introduced in the House by Rep. Dennis Kucinich as HR 2977 has been re-written.

The new, revised bill, HR 3616, "Space Preservation Act of 2002" was introduced January 23, 2002.

Re-writing bills is a common enough practice as a bill goes through the legislative process. However, the differences between HR 2977 and HR 3616 are more than just a few tweaks here or there.

By its conspicuous appearance in 2977, the term 'chemtrails' received a form of credibility within the official government process never seen before...producing the hope that one courageous Representative had finally had the fortitude to take the issue of chemtrails to a level of Congressional scrutiny long overdue.

Even though chemtrails are sprayed/deployed in the 2-6 mile high range, and not the 60 mile altitude stated in 2977, the simple fact of their inclusion in Kucinich's 2977 list of weapons systems was deemed a major breakthrough by tens of thousands of citizens and researchers across the country who have been monitoring and investigating the spraying going on in the skies of America for the past three years.

In Rep. Kucinich's revised new (some would say 'emasculated') Bill, HR 3616, there is no longer any mention whatever of:

- chemtrails,
- particle beams
- electromagnetic radiation
- plasmas
- extremely low frequency (ELF) or ultra low frequency (ULF) energy radiation
- or mind-control technologies

as weapons systems covered in the measure.

In fact, 'Exotic Weapons' - as boldly-stated in HR 2977 - are not even mentioned in HR 3616. So, what happened here? Did someone have a 'friendly chat' with Rep. Kucinich? Did the Congressman inhale a bit too much aluminum during his morning job? Did he look up one day and find himself standing under a big 'X' and feel his knees get a little wobbly?

As stated in Kucinich's first version of his "Space Preservation Act of 2001" -

"The term 'exotic weapons systems' includes weapons designed to damage space or natural ecosystems (such as the ionosphere and upper atmosphere) or climate, weather, and tectonic systems with the purpose of inducing damage or destruction upon a target population or region on earth or in space."

Apparently Rep. Kucinich is no longer concerned about the effects of the testing and use of exotic weapons systems on natural ecosystems and living organisms on the planet.

Although chemtrails are no longer stated as a weapons system, or even mentioned in HR3616, the question of the components of the RFMP / VTRPE warfare system is raised.

HR 3616 states -

"To preserve the cooperative, peaceful uses of space for the benefit of all humankind by prohibiting the basing of weapons in space and the use of weapons to destroy or damage objects in space that are in orbit, and for other purposes."

The intent of this passage remains fuzzy. Example: Are Imaging satellites used with the RFMP / VTRPE system broadly defined as part of a weapons system ?

HR 3616 further states -

"The terms 'space-based weapon' and 'space-based system' mean a device capable of damaging or destroying an object or person by directing a source of energy against that object or person."

The word "directing" is clearly the key. Strictly speaking, the RFMP system does, by imaging, provide information to direct a source of energy against that particular object or person

HR3616 also says -

"4) civil, commercial, or defense activities (including communications, navigation, surveillance, reconnaissance, early warning, or remote sensing) that are not related to space-based weapons or systems."

They could say the RFMP is not a weapon - it does not "fire a bullet," but it is part of a weapons system. There are clearly serious issues of definition in Kucinich's new Bill. It is conceivable that the RFMP / VTRPE weapons system may fall in the area covered by HR3616.

It remains a mystery as to how the word 'chemtrails' appeared in HR 2977 to begin with. Investigation into that point is ongoing. Who actually is authoring the text of these bills? Why such an emphasis on "exotic weapons" in HR 2977 but then nothing mentioned about them in HR 3616?

My call to Rep. Kucinich's Washington office last week was brief. I was told there had been "quite a few" calls regarding HR 2977. I was then told my questions should be directed to the person on the congressman's staff who handled that bill. I was then transferred to that person and received...big surprise...their voice mail service. I left a message with my contact information. No reply has been received to date. I will place a follow-up call again this week. We suggest others do the same.

Even though the term 'chemtrails' has been removed from the revised bill, efforts to continue to educate and alert others about the chemtrail issue go on. Many thanks to those who have taken the time to contact their Congressional Representatives, keep it up.

We still know what we see. We still didn't consent. We still want it stopped.

H. R. 2977

To preserve the cooperative, peaceful uses of space for the benefit of all humankind by permanently prohibiting the basing of weapons in space by the United States, and to require the President to take action to adopt and implement a world treaty banning space-based weapons.

IN THE HOUSE OF REPRESENTATIVES

October 2, 2001

Mr. KUCINICH introduced the following bill; which was referred to the Committee on Science, and in addition to the Committees on Armed Services, and International Relations, for a period to be subsequently determined by the Speaker, in each case for consideration of such provisions as fall within the jurisdiction of the committee concerned

A BILL

To preserve the cooperative, peaceful uses of space for the benefit of all humankind by permanently prohibiting the basing of weapons in space by the United States, and to require the President to take action to adopt and implement a world treaty banning space-based weapons.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the 'Space Preservation Act of 2001'.

SEC. 2. REAFFIRMATION OF POLICY ON THE PRESERVATION OF PEACE IN SPACE.

Congress reaffirms the policy expressed in section 102(a) of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451(a)), stating that it is the policy of the United States that activities in space should be devoted to peaceful purposes for the benefit of all mankind.'

SEC. 3. PERMANENT BAN ON BASING OF WEAPONS IN SPACE.

The President shall--

- (1) implement a permanent ban on space-based weapons of the United States and remove from space any existing space-based weapons of the United States; and
- (2) immediately order the permanent termination of research and development, testing, manufacturing, production, and deployment of all space-based weapons of the United States and their components.

SEC. 4. WORLD AGREEMENT BANNING SPACE-BASED WEAPONS.

The President shall direct the United States representatives to the United Nations and other international organizations to immediately work toward negotiating, adopting, and implementing a world agreement banning space-based weapons.

SEC. 5. REPORT.

The President shall submit to Congress not later than 90 days after the date of the enactment of this Act, and every 90 days thereafter, a report on--

- (1) the implementation of the permanent ban on space-based weapons required by section 3; and
- (2) progress toward negotiating, adopting, and implementing the agreement described in section 4.

SEC. 6. NON SPACE-BASED WEAPONS ACTIVITIES.

Nothing in this Act may be construed as prohibiting the use of funds for--

- (1) space exploration;
- (2) space research and development;
- (3) testing, manufacturing, or production that is not related to space-based weapons or systems; or
- (4) civil, commercial, or defense activities (including communications, navigation, surveillance, reconnaissance, early warning, or remote sensing) that are not related to space-based weapons or systems.

SEC. 7. DEFINITIONS.

In this Act:

(1) The term 'space' means all space extending upward from an altitude greater than 60 kilometers above the surface of the earth and any celestial body in such space.

(2)(A) The terms 'weapon' and 'weapons system' mean a device capable of any of the following:

(i) Damaging or destroying an object (whether in outer space, in the atmosphere, or on earth) by--

(I) firing one or more projectiles to collide with that object;

(II) detonating one or more explosive devices in close proximity to that object;

(III) directing a source of energy (including molecular or atomic energy, subatomic particle beams, electromagnetic radiation, plasma, or extremely low frequency (ELF) or ultra low frequency (ULF) energy radiation) against that object; or

(IV) any other unacknowledged or as yet undeveloped means.

(ii) Inflicting death or injury on, or damaging or destroying, a person (or the biological life, bodily health, mental health, or physical and economic well-being of a person)--

(I) through the use of any of the means described in clause (i) or subparagraph (B);

(II) through the use of land-based, sea-based, or space-based systems using radiation, electromagnetic, psychotronic, sonic, laser, or other energies directed at individual persons or targeted populations for the purpose of information war, mood management, or mind control of such persons or populations; or

(III) by expelling chemical or biological agents in the vicinity of a person.

(B) Such terms include exotic weapons systems such as--

(i) electronic, psychotronic, or information weapons;

(ii) chemtrails;

(iii) high altitude ultra low frequency weapons systems;

(iv) plasma, electromagnetic, sonic, or ultrasonic weapons;

(v) laser weapons systems;

(vi) strategic, theater, tactical, or extraterrestrial weapons; and

(vii) chemical, biological, environmental, climate, or tectonic weapons.

(C) The term 'exotic weapons systems' includes weapons designed to damage space or natural ecosystems (such as the ionosphere and upper atmosphere) or climate, weather, and tectonic systems with the purpose of inducing damage or destruction upon a target population or region on earth or in space.
