

To: Governor Schwarzenegger
Cc: California Air Resources Board

Thank you for your continued leadership in tackling global warming. The next step for California is to adopt strong policies to deter global warming pollution and invest in long-term solutions that will kick our dependence on fossil fuels.

Please don't give the state's biggest polluters their pollution "credits" for free. Instead, make polluters pay for every ton of pollution they emit, and then funnel that money to wind and solar power, greener buildings and a cleaner transportation system.

Thank you.
