Dear Mary

Re: The ~~As~~ Scoping Home;
BRAVO!

My suggestion now is to take it on
as though it's a political candidate
more than just hearings, press
events, examples of how businesses
will prosper but improved efficiency
and California's economy prospered
by other air quality regulations, etc.

Also improved their productivity by
a huge amount when they changed
processes to reduce just one CAFE
in fuel now so they be more to help
themselves for the future
