

8-11-34 Michael Phung
Oakland CA

Letter

Dear, Chairman Nikhol:

My name is Michael Phung. I am a student at Oakland High School. I'm glad that I learn about diesel pollution from guest speakers and video I have watched in a website because it is concern about human's health condition. Things that I learned are amount of people that were sick from exposing a lot of diesel fuel produced by trucks, they mainly live near a freeway because all trucks have to go through the freeway. By exposing too much diesel from trucks, it causes Asthma, death, lost work and missed school days. Diesel fuel came from ships, trains and trucks that can harm the air we breath. To prevent this problems, people are replacing the filter of the trucks. Health care are very expensive. People have change the route for trucks to go where mainly toward close to the freeway.

Sincerely,
Michael Phung
