TO Whom it may concern:

Hi! my name is De'Janae Bates, I attend Mardela High School part of Fremont Federation. Lots of trucks go and come from the high street interstate. I think that it will help alot if they get filters for diesel trucks because alot of people around the world have ~~be~~ been catching cancer or asthma and that is very disturbing and I feel for people who have cancer and I want it to be less affecting things in air environment and it would be less cancer and asthma going around.

Sincerely,
De'Janae Bates
