

Dear Chairman Nichols, My name is Ben Moli, I am 17 years old. It is important to have a good truck rule that reduces diesel pollution because not only will it clean the air but it will put a cap on the breathing and intaking of these harmful toxic fumes. My brother and friends have asthma and when trucks come through our neighborhood, which are there truck routes, It makes it hard for them to breathe. It is upsetting to know that diesel pollution if exposed to it too much can give you a heart disease, and I've lived in this neighborhood for all my life, breathing all this toxic fumes in the Air. Please do something about this problem to avoid future problems.

Sincerely, Ben Moli
