

Honorable Mary Nichols  
California Air Resources Board  
1001 I Street  
Sacramento, CA 95814

Dear Honorable Nichols,

Please reject any proposals that would weaken the zero emission vehicle regulation and stop progress toward cleaner, healthier air in our state. For the children with asthma and adults who suffer from lung diseases, air pollution makes breathing a difficult task. The air board needs to show strong leadership by requiring the car companies to make more zero emission cars. Weakening the zero emission vehicle rule will only delay cleaner air for all Californians.

Sincerely,  
Sara Huang  
900 Hyde St  
San Francisco, CA 94109
