

The policy "don't starve/die now, the solution will be in the future is absurd!"

ZEV technology
is available

↳ right now
↳ see "TESLA"

The cost-inhibiting aspect could be dealt with with initial subsidies the "oil industry" has been receiving for years -

Also the ~~problematic~~ monopoly on the lithium batteries by oil companies needs to be addressed

So that the ZEVs are more affordable, cost effective and improved,
