Attention: Mary Nichols

The EASTERN ELECTRIC VEHICLE CLUB of Valley Forge, Pa. is concerned with a report that we received which indicates you may be considering making changes to your proposed Zero Emission Vehicle policy. It is our understanding that you are considering reducing the number of Zero Emission Vehicles required by automakers by 90% in the 2012-2014 time period.

If you are considering reducing the demands for Zero Emission Vehicles please reconsider. It is our conviction that automakers will more rapidly advance zero emission vehicles and make them more readily available to the public if you force them to do so. Not everyone has the power and influence that you do in determining a cleaner transportation system. Please take advantage of your position.

Thank you for your consideration.

Mr. Oliver H. Perry
President EEVC
