SUBJECT: PUBLIC RELEASE OF EMFAC2014 UPDATE, v1.0.7

---

Today, ARB is releasing an updated version (v1.0.7) of EMFAC2014 to the public. This version will replace the current version (v1.0.1) that was previously released in December 2014. The new version will be submitted to USEPA for approval.

The latest version (v1.0.7) of the model represents ARB's current understanding of motor vehicle travel activities and their associated emission levels. A list of updates that have been made since the initial release of v1.0.1 is available at:

[http://www.arb.ca.gov/msei/emfac2014\\_updates.htm](http://www.arb.ca.gov/msei/emfac2014_updates.htm)

It is strongly recommended that users thoroughly read the updated User's Guide before installing and running the model. You can download the latest EMFAC2014 Installation Package, the User's Guide, the Technical Documentation, and the PL Handbook at:

<http://www.arb.ca.gov/msei/categories.htm>

In addition, a corresponding EMFAC2014 (v1.0.7) Web Database is now available at:

<http://www.arb.ca.gov/emfac>

This database is based on default EMFAC2014 (v1.0.7) activity data. A companion database that will have specific MPO activity data updates is currently under development. Please note that although both EMFAC2011 and EMFAC2014 versions of the Web Database are available now, EMFAC2011 is still the currently USEPA approved version of EMFAC.

*The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.*
