

Please read the following before using the Products In Progress List:

The Air Resources Board (ARB) has prepared this Products In Progress List for use when doing visual inspection of diesel vehicles with gross vehicle weight rating (GVWR) of 14,000 lbs or lower. The list contains add-on and modified parts with pending anti-tampering exemption applications. If the part is listed, then it will not cause the vehicle to fail Smog Check even in the absence of an Executive Order (EO). To complete the Smog Check inspection, diesel vehicles would still be required to pass the visible smoke test, meet the OBD checks, and be equipped with the required emission control components as specified in the Smog Check Inspection Procedures Manual.

Smog Check technicians should check the list on a regular basis. Use of this list will end by **December 31, 2011**.

“Notification to the Diesel Vehicle Operator”

Owners of diesel vehicles equipped with aftermarket parts listed on the Products in Progress List will be notified by the Smog Check technician that their vehicle has passed with an aftermarket part(s) that is currently undergoing tests. Depending on the test results, these parts may not obtain approval or EO, and should this occur your vehicle will fail the next Smog Check. Vehicle owners/operators are encouraged to check with their aftermarket part distributors before their next Smog Check, for updates or recalls.

PRODUCTS IN PROGRESS LIST
(Parts with Pending VC 27156 Exemption Applications)

COMPUTER MANAGEMENT			
Company	Product	Vehicle Application Summary	
		Model Year	Make/Class
Bully Dog	Triple Dog GT Tuner	1999-2010	7.3, 6.0, 6.4L Ford Trucks
Bully Dog	Triple Dog GT Tuner	2001-2010	6.6L GM Trucks
Bully Dog	Triple Dog GT Tuner	2003-2010	5.9, 6.7L Cummins engine
