Footnotes:

How to use this table

1. Find vehicle make and model year from the two last columns
2. Find the corresponding EO from the second column
3. Click on the EO, if shown as a link, or enter the information in ARB web site to see the list of vehicles covered by the EO.
ARB WEB SITE: www.arb.ca.gov/msprog/aftermkt/devices/amquery.php
4. Click on **VIEW PDF** and scroll down to the list of vehicles.
5. Compare the engine test group (engine family) from the underhood label on your vehicle to the ones listed in the EO to ensure that there is a match.

New Label Requirements

The label on the catalytic converter shell must be ½ inch high and large enough to be read from a distance of 5 feet from either side of the vehicle. The label must show the EO, specific part number (universal or direct-fit) for the vehicle, and date of production (month and year). In assigning specific part numbers, manufacturers have taken into consideration each vehicles exhaust configuration, including the location of the oxygen sensors, pipe size, etc. Therefore, no modifications should be required to fit a catalytic converter on a vehicle other than weld it in, where necessary.

What is Legal for Sale by January 1, 2009?

Only aftermarket catalytic converters that meet the new regulations can be sold and installed on appropriate vehicles in California. Previously exempted OBD II catalytic converters not sold and installed by the above date must be returned to manufacturers for compliant label and warranty card.

List Updated: 08/08/2018 (The list will be updated on a regular basis as new or update exemption applications are received).
