

Andrew Papson

Electric Bus Program Manager

Foothill Transit

Andrew Papson is a clean transportation professional focusing on zero emission electric buses at Foothill Transit. As the Electric Bus Program Manager, Andrew tackles many challenging issues related to deploying an electric bus fleet including operating costs, charging solutions, regulatory mandates and funding opportunities. He has worked on technologies and vehicles across the fuel spectrum including hydrogen fuel cell, battery-electric, natural gas, hybrid vehicles and other low-emission technology. His multi-disciplinary work has spanned industry sectors from transit to heavy duty trucks. Andrew is also experienced in greenhouse gas reduction and mitigation strategies as well as air quality and health impact analysis.
