

Frank DeRosa

*Principal, Advanced Solutions
SunEdison Inc.*

Frank DeRosa is Principal, Advanced Solutions for SunEdison, Inc., where he is responsible for EV grid integration. Prior to this role, he was responsible for North America utility-scale solar development. Before SunEdison, he was Senior Vice President and Regional Manager for The Americas for First Solar. He also founded and was CEO of NextLight Renewable Power, the largest independent solar energy development company in North America at the time. Frank also had various positions at PG&E, one of which was running the Company's RPS program. Frank has testified before Congress and state authorities on energy markets, facilities siting, and electricity regulation.
