

**Nathan Bruner**

*Clean Transportation Program Business Development Manager  
San Diego Gas and Electric*

Nathan Bruner is the Business Development Manager for SDG&E's Clean Transportation Program where he manages clean transportation program operations and is the Project Manager for the implementation of the Power Your Drive Program.

Prior to coming to the Clean Transportation Team, he was a Supervisor for residential and multifamily energy efficiency programs at SDG&E and was the statewide lead in development of a statewide template for the design of Residential Market Transformation Programs in California.

His previous experience includes 20 years as a civil engineer for the City of San Diego in several roles. His last 10 years at the City, he designed and implemented the City's utility undergrounding program, expanding it more than five-fold and making it the largest utility undergrounding program in the country, earning him and the program numerous local and national awards for innovations, public private partnerships and customer delivery. Nathan served in the U.S. Navy Civil Engineer Corps for six years and holds a bachelor's degree from the University of San Diego in Business Economics.
