

CARB Biography

Mike Finnern – Manager of Controls and Electrical Engineering

Mike joined Proterra in 2009 after having spent over ten years in the automotive industry with both MAHLE Powertrain and Ford Motor Company. Mike has been responsible for many powertrain development and certification projects involving alternative fuels and hybrids. While at Ford, Mike received a Henry Ford Technology Award for helping to develop the world's first Partial Zero Emissions (PZEV) certified V6 engine.

Mike currently leads the Proterra engineering team responsible for vehicle controls, systems integration, and vehicle performance.
