Ricky Hanna
Electric Vehicles International
1627 Army Court #1
Stockton, CA 95206

Dear Mr. Hanna,

This letter is in response to the request by Electric Vehicles International (EVI) to the Air Resources Board (ARB) to approve of the 2014 model year vehicle EVI MD-100 in engine family EEVI10000MD1 as a heavy-duty electric vehicle.

The ARB is required to certify all on-road vehicles. The certification protocol and test procedures for zero-emission heavy-duty vehicles (HD-ZEV) with gross vehicle weight rating (GVWR) above 14,000 pounds are in the development process. Prior to the finalization and adoption of HD-ZEV certification protocols and test procedures, heavy-duty electric vehicles may be produced for sale in California if the vehicles do not emit any criteria pollutant exhaust emissions or fuel-based evaporative emissions.

The ARB has determined that the information submitted by EVI demonstrates that the vehicle model listed above does not emit any criteria pollutant exhaust emissions or fuel-based evaporative emissions. Therefore, this letter approves the designation of the above listed vehicle model as an electric heavy-duty vehicle that can be sold in California provided all vehicles are produced during the 2014 model year production period.

If you have additional questions or comments regarding this matter, please contact Ms. Kimberly Pryor, Manager, at 626-575-6640 or by email at kpryor@arb.ca.gov.

Sincerely,

Jackie Lourenco
Branch Chief
Emissions Compliance, Automotive Regulations and Science Division
