Erich Kopp
Application Engineer
Webasto Thermo & Comfort North America, Inc.
15083 North Road
Fenton, MI 48430

Dear Mr. Kopp:

By this letter, the Air Resources Board (ARB) hereby approves two fuel-fired heaters manufactured and marketed by Webasto Thermo & Comfort North America, Inc. (Webasto) as meeting the idling emissions reduction requirements specified in Sections 1956.8(a)(6)(D) and 2485(c)(3)(B) of the Title 13, California Code of Regulations. Approved models are ThermoPro 50 Eco and ThermoPro 90. The heaters are permitted to be installed and operated on all heavy-duty diesel-fueled vehicles with a gross vehicle weight rating (GVWR) over 14,000 pounds, and all diesel-fueled commercial motor vehicles with a GVWR over 10,000 pounds.

To aid field identification and enforcement activities, Webasto may label the heaters approved herein. The label, either a separate one or part of an existing label, may make reference to this approval, e.g., "ARB Approval #CIHD-2014-016" or some other phrase to this effect. The label shall be affixed to the heater and shall not be affixed to any exterior surface of the vehicle into which the heater is installed. The label shall not have an oval shape and shall not exceed 2 inches in height or 3 inches in width. Claims of being "approved" by ARB may be used, however, claims of being "certified" by ARB is not permitted, in any oral or written representations or advertisements.

No change may be made to the hardware or control calibrations of the heaters as described in Webasto's application dated April 07, 2014, and all supplemental information provided for the approval herein, unless specific ARB approval is granted.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.
