   2. Emission Control System Warranty Regulations [Title 13, California Code of Regulations, Sections 2035 et seq. (13 CCR §2035 et seq.)]

POLICY:

According to HSC §43205(b), and 13 CCR §2037(c), §2435(b), the 1994-2003 AFR System Certification Installation Procedures, or the 2004+ AFR System Certification and Installation Procedures, as applicable, the high-priced warranted parts list is based on a periodically revised cost limit as calculated for the highest-cost metropolitan area of California. For MY 2019, and CY 2018 and CY 2019 as applicable for AFR systems, the highest-cost metropolitan area of California is determined to be the San Jose-Sunnyvale-Santa Clara area.

The high-price warranty parts lists should reflect actual part costs to owners at the dealership that include dealer markup. The labor cost, as part of a manufacturer's determination of the total replacement cost of a warranted part, is to be based on the manufacturer's labor rate in the identified highest-cost metropolitan area or, if the manufacturer has no dealerships in this area, a comparable alternative area in California.

2. a. Cost Limit for High-Priced Warranted Parts for New MY 2019 PC, LDT, MDV/E and LSIE.

According to 13 CCR §2037(c) or §2435(b), as applicable, the cost limit for high-priced warranted parts for MY 2019 PC, LDT, MDV/E, and LSIE is calculated using the annual average nationwide urban Consumer Price Index.
(CPI) for 2017, i.e., the calendar year two years prior to the model-year for which the cost limit is being calculated. This CPI is published by the U.S. Bureau of Labor Statistics. Rounded to the nearest ten dollars, the MY 2019 cost limit is $620, as calculated below:

\[
\text{MY 2019 Cost Limit} = 300 \times \left( \frac{\text{calendar 2017 CPI}}{\text{baseline CPI}} \right) \\
= 300 \times \left( \frac{245.1}{118.3} \right) \\
= 620
\]

According to 13 CCR §2419.1(c), the cost limit for high-priced warranted parts for MY 2019 OHRV evaporative emission control systems is calculated using the annual average nationwide urban CPI for 2017, i.e., the calendar year two years prior to the model-year for which the cost limit is being calculated. This CPI is published by the U.S. Bureau of Labor Statistics. Rounded to the nearest ten dollars, the MY 2019 cost limit is $200, as calculated below:

\[
\text{MY 2019 Cost Limit} = 200 \times \left( \frac{\text{calendar 2017 CPI}}{\text{baseline CPI}} \right) \\
= 200 \times \left( \frac{245.1}{240.0} \right) \\
= 200
\]

According to the 2004+ AFR System Certification and Installation Procedures, the cost limits for high-priced warranted parts for 2004+ AFR systems certified during CY 2018 and CY 2019 are calculated using the annual average nationwide urban CPI for 2016 and 2017, respectively, i.e., the calendar year two years prior to the calendar year for which the cost limit is being calculated. This CPI is published by the U.S. Bureau of Labor Statistics. Rounded to the nearest ten dollars, the CY 2018 and CY 2019 cost limits are $610 and $620, respectively, as calculated below:

\[
\text{CY 2018 Cost Limit} = 300 \times \left( \frac{\text{calendar 2016 CPI}}{\text{baseline CPI}} \right) \\
= 300 \times \left( \frac{240.0}{118.3} \right) \\
= 610
\]

\[
\text{CY 2019 Cost Limit} = 300 \times \left( \frac{\text{calendar 2017 CPI}}{\text{baseline CPI}} \right) \\
= 300 \times \left( \frac{245.1}{118.3} \right) \\
= 620
\]

According to the 1994-2003 AFR System Certification and Installation Procedures, the cost limits for high-priced warranted parts for 1994-2003 AFR systems certified during CY 2018 and CY 2019 are calculated using the annual average nationwide urban CPI for 2016 and 2017, i.e., the calendar year two years prior to the certification’s calendar year for which the cost limit is being calculated. This CPI is published by the U.S. Bureau of Labor Statistics. Rounded to the nearest ten dollars, the CY 2018 and CY 2019 cost limits are $590 and $600, respectively, as calculated below:

CY 2018 Cost Limit = $300 × (calendar 2016 CPI/baseline CPI)
= $300 × (240.0/121.9)
= $590

CY 2019 Cost Limit = $300 × (calendar 2017 CPI/baseline CPI)
= $300 × (245.1/121.9)
= $600

3. Guidance on meeting the requirements for the items listed below may be found in MAC 17-03, available at this web link.

https://www.arb.ca.gov/msprog/macs/mac1703/mac1703.pdf

- The high-priced warranted parts must be documented in the manufacturer’s certification application. For non-OHRV, parts up to $100 below the cost limit must be listed. For OHRV, parts up to $50 below the cost limit must be listed. Ref. MAC 17-03, section 3.
- For high-priced parts consistently above the cost limit, cost documentation may be waived. Ref. MAC 17-03, section 4.
- For a part that is integral to a larger assembly, the repair or replacement cost of the entire assembly may be cost determinant. Ref. MAC 17-03, section 5.
- A cost limit for MY 2020 and later vehicles and engines may be proposed by the manufacturer before a newer cost limit is determined by CARB. Ref. MAC 17-03, section 6.
- The cost limit listed in this MAC is not applicable to transitional zero-emission vehicles. Ref. MAC 17-03, section 7.
- The cost limit listed in this MAC is not applicable to vehicle that generate additional NMOG+NOx fleet average credits. Ref. MAC 17-03, section 8.
The cost limits for AFR systems are determined by the calendar year in which certification is granted. Ref. MAC 17-03, section 9.

A malfunctioning part that illuminates the malfunction indicator light (MIL) must be identified as emissions related. Ref. MAC 17-03, section 10.
