

Fact Sheet: The TIMBER Program

Helping California's log truck owners reduce pollution

The Carl Moyer Truck Improvement/Modernization Benefitting Emission Reductions (TIMBER) Program provides a streamlined approach for replacing older, high-polluting heavy-duty log trucks earlier than required. The TIMBER program helps reduce some of the costs associated with replacing a log truck with a new or used log truck.

How much TIMBER funding may a truck owner receive?

- Voucher amounts range from \$10,000 to \$60,000. In general, the older the engine model year and the higher the yearly mileage, the larger the funding award. See the table on the next page.
- No more than 10 log trucks under common ownership per year can be funded.

Who can take advantage of TIMBER?

Eligible applicants must:

- Be registered for the Truck and Bus Regulation Log Truck Phase-In option, the NOx Exempt Area extension or the Small Fleet option. For more information, see the Truckstop at <http://www.arb.ca.gov/msprog/truckstop/truckstop.htm> or call the diesel hotline at (866) 6DIESEL (866-634-3735).
- Have log truck(s) with at least 75 percent of their operation (miles traveled or fuel consumed) over the last two years within California (partial registration for three months per year may still be eligible).

Note: A log truck can be based out of state and still be eligible but must be registered under the California IRP (See <http://www.dmv.ca.gov/vehindustry/irp/irpinfo.htm>).

What replacement vehicles are eligible for TIMBER?

New or used 2010 or newer engine model year log trucks with California certified engines (0.50 g/bhp-hr NOx and 0.01 g/bhp-hr PM or cleaner) purchased through any participating dealership

Where can you apply for the TIMBER program?

Truck owners can apply at any participating dealership listed at www.arb.ca.gov/msprog/moyer/timber/dealerlist/dealerlist_timber.htm

What is the process for applying for funds?

- The applicant completes and submits a TIMBER application and required documentation at a participating dealership.
- The dealership forwards the application to any participating air district.
- The air district evaluates and approves the completed application within ten business days.
- The applicant is responsible for the cost of the vehicle minus the TIMBER voucher amount.

Are there additional applicant requirements?

- The old log truck must have minimum annual usage of 6,000 miles (or 1,100 gallons of diesel fuel consumed).
- The applicant must agree to:
 - Return annual usage reports as requested by the air district throughout the voucher term
 - Operate the vehicle at least 75% of the time within California throughout the voucher term
 - Allow the Air Resources Board to verify registration and inspect the vehicle throughout the voucher term
 - Be responsible for the cost of the vehicle minus the TIMBER voucher amount

What happens to the old log truck in a replacement project?

The old log truck is destroyed.

I have a log truck with a GVWR of 33,001 lbs or greater that occasionally carries construction materials during the off-season and I am not opted in to the Log Truck Phase-In option. Am I eligible for the TIMBER program?
 If you are opted in to the NOx Exempt Area extension or the Small Fleet option, you may be eligible to apply. However, you must have either a letter from an employer stating that you haul logs for that employer or a copy of an invoice (with private information removed) showing that you hauled logs (not only timber and other wood or non-wood products) at least once in the last 12 months, and you must have log bunks attached to your baseline truck during pre-inspection.
More information about TIMBER can be obtained at www.arb.ca.gov/msprog/moyer/timber/timber.htm or by calling 866-6DIESEL (866-634-3735).

TIMBER Funding Table											
Truck Improvement/Modernization Benefitting Emission Reductions											
Log Truck Replacements, \$18,260 C/E											
Engine Model Year	LTPIO = Log Truck Phase-In Option, NE = NOx Exempt Area Extension, SF = Small Fleet Option. Used replacements capped at \$50,000.
