**Peterson construction repower for Cat 992C**  
**Subject: Non-feasible installation**

Dear John,

After giving thorough consideration to the matter, our team of HUSS Engineers and Installation Technicians have come to the conclusion that it is currently not feasible to install HUSS DPF devices on the following machine:

Caterpillar 992C

The primary issues with the installation include lack of sufficient room for mounting the filter systems which could lead to sufficient operator distraction, enough to potentially create a safety hazard during machine operation.

Please feel free to contact us should you have any additional questions on this matter.

Thank you for your interest in HUSS products!

Sincerely,  
Huss, LLC
