

Truck and Bus Regulation How to Report with Paper Forms - 2018

Last Revised December 15, 2017

Introduction

This guide summarizes the steps fleet owners need to take to report new or updated company and vehicle information as required in the Truck and Bus regulation (Title 13, California Code of Regulations, section 2025) using paper forms. There are no fees associated with reporting. Reporting is also available online; fleets that report online may easily view and update fleet information; if the fleet is in compliance they may print a certificate of compliance at any time. Fleets that are unable to report online may use paper forms to report the information needed to demonstrate compliance with the Truck and Bus regulation (regulation). The next reporting deadline is **January 31, 2018**.

The Truck and Bus regulation affects individuals, private companies, and Federal agencies that own diesel vehicles with a Gross Vehicle Weight Rating (GVWR) greater than 14,000 lbs. that operate in California. The regulation also applies to publicly and privately owned school buses; however, their compliance requirements are different and reporting is not required. The regulation does not apply to state and local government vehicles and public transit buses because they are already subject to other regulations. Vehicles that are exempt from other heavy duty diesel regulations, such as Cargo Handling Equipment, Drayage Truck, and Solid Waste Collection Vehicle regulations, may be subject to the regulation. Drayage and solid waste collection trucks with 2007 to 2009 model year engines must meet the requirements of the regulation by January 1, 2023.

This guide is not a substitute for reading and understanding the regulation. You should be familiar with the terms defined in the regulation, the requirements, and what exemptions or extensions for which the vehicle qualifies. Regulation language, advisories, fact sheets, and other compliance tools for the Truck and Bus regulation can be found at www.arb.ca.gov/dieseltruck.

Beginning 2020, only trucks compliant with Truck and Bus regulation will be allowed to register with the DMV. The DMV will use the VIN to confirm compliance of vehicles taking advantage of flexibility options in the regulation. The California Air Resources Board (CARB) will use the vehicle identification number (VIN), along with engine and retrofit particulate matter (PM) filter information to confirm upgrade requirements are met. **It is crucial that the information you report to the California Air Resources Board (CARB) for your trucks or buses is accurate to ensure you will not experience any delays registering your vehicle with DMV.**

2018 Compliance Requirements

The following compliance requirements are in effect starting January 1, 2018:

- Fleets eligible to use the Small Fleet Option must have a PM filter retrofit installed on their third vehicle.
- All **lighter vehicles** (GVWR between 14,000 and 26,000 lbs.) with a 1998 and older model year engine must be retired, or upgraded with a 2010 or newer model year engine unless the vehicle is using a flexibility option that delays the upgrade requirement.
- Vehicles using the **Agricultural Mileage** extension must report their end of year odometer reading.

- Fleet owners using the **Low Mileage Work Truck Option** must have PM filter retrofits installed on 100% of the fleet and report their end of year odometer reading.
- Fleet Owners using the **NOx Exempt Area** option must have PM filter retrofits installed on 70% of the fleet.
- Fleet owners using the **Log Truck Phase-In** option must have upgraded 50% of the vehicles to 2010 or newer model year engines. This means fleets with only one Log Truck using this option must replace the vehicle with one that has a 2010 or newer model year engine.
- The **Heavy Crane Phase-In** schedule begins. Fleet owners using this option must upgrade 10% of their heavy cranes to 2010 or newer model year engines, if the vehicle met the PM filter requirement (with an OEM or Retrofit) by January 1, 2018, it is considered to meet the final 2010 engine requirement of the regulation.

Compliance Deadlines that have already passed:

Vehicles described below are out of compliance and must not be operated unless they are currently using a flexibility option.

- All heavier vehicles (GVWR more than 26,000 lbs.), with an engine model year 1995 and older.
- All heavier vehicles with a 1996 or newer model year engine that do not have a PM filter (OEM or Retrofit).
- All lighter vehicles (GVWR between 14,000 and 26,000 lbs.) with an engine model year 1997 and older. Those with 1998 model year engines must be upgraded to a 2010 or newer model year engine by January 1, 2018.
- NOx Exempt Area extension (for single truck owners)
- Phase-In with Credits (excluding advanced technology)
- Unavailability of PM Filter extension
- Small Fleet Option

Options no longer available for initial opt-in:

The compliance options listed below are closed and are only available for fleets re-selecting the option for previously approved vehicles or replacing a previously approved vehicle:

- Agricultural Vehicle Extension
 - Including the Log Truck Phase-In Option
- Agricultural Specialty Vehicle Extension
 - Including the Cattle Vehicle Extension

Who Needs to Report in January of Each Compliance Year

Vehicles in compliance with the Engine Model Year Schedule that are not using any credits or flexibility options (whether the option be fleet or vehicle based such as NOx Exempt or low-use) do not need to be reported.

Vehicle owners that use flexibility options in the regulation must identify which vehicles will use a specified vehicle option for the year and provide any additional information specific to that option. For example, if you claim a mileage based extension, you will need to provide the January odometer reading and date for the vehicle. If you failed to meet the eligibility requirements of an option or extension after claiming it for a given vehicle, you must bring the vehicle into compliance by retrofitting or retiring the vehicle as required by the engine model year schedule. You will not be eligible to claim another flexibility option in any future compliance year. You also need to report changes to your fleet within 30 days throughout the year when selling or adding vehicles.

Any vehicle that meets the requirements to use a flexibility option must be reported to show that they met the requirements by the applicable deadline. Fleet owners using mileage-based extensions must provide

their January 1, odometer reading each compliance year and confirm whether they will continue to use the same mileage-based extension for 2018. Following is a list of compliance options that are currently available:

NOx Exempt Area Extension
Manufacturer Delay
Low Use Exemption
Heavy Crane Phase-In Option

*For a description of each compliance path, go to the end of these instructions.

Verification of eligibility of claimed flexibility options is continuously enforced. Vehicle Owners must keep records and provide proof in a timely manner to ARB staff upon request or the reporting account could be blocked and disable the ability to print a certificate.

How to Report

Vehicle owners may manage fleet information by reporting online to obtain a certificate of compliance immediately, if the fleet is in compliance. However, if you do not have access to the internet you may fill out the paper forms located at the end of this document and mail them to our office.

To Report Online

To report online you will need to use the Truck Regulation Upload, Compliance and Reporting System (TRUCRS) available at: https://ssl.arb.ca.gov/ssltrucrsto/trucrs_reporting/login.php Here you will be able to create an account (if you are a first time user) or login to your account if you have already created one. Once you are logged in you may update your vehicle and company information at your convenience and immediately print a certificate of compliance. Reporting is open January 1- January 31 of every year. Fleets must report by January 31 to claim a flexibility option for the current compliance year. A guide with step by step online reporting instructions can be found on the login page of the reporting system.

If you have a TRUCRS account but have forgotten your login information **do not create a new account**; use the "Forgot Username/Password" feature on the login screen by providing the email address and username used when the account was initially created. If you try to create a new account it will be identified as a duplicate and your accounts will be locked until you contact TRUCRS staff for assistance.

If you do not recall the username created or the email address used you may call the diesel hotline for assistance. If you no longer have access to the email address used when the account was created, fill out the Change Login Information form and email or mail it to the address located on the form.

<http://www.arb.ca.gov/msprog/onrdiesel/documents/tbpwchange.pdf>

To Report on Paper Forms

The hard copy reporting forms are located at the end of this document. You must use the current forms to report your company, vehicle, and engine information. Once you have provided all of the required information on the form, you will need to mail the form to the address listed at the end of this document. Incomplete forms will be rejected. We recommend you make copies of the completed forms prior to submission to our office and file them for future reference or in case of a fleet audit. The deadline for mailing the form is January 31, 2018. Please do not report online and on hard copy forms. Only one method of reporting is required.

What Information do I Need to Report?

In general you will need to report company and owner information along with vehicle and information for every diesel vehicle you own with a GVWR greater than 14,000 lbs. that operated in California, unless complying with the Engine Model Year schedule and not using a flexibility option. If you have previously reported you will need to report any changes in company information, especially contact information to ensure that you receive important notifications such as potential issues with renewing vehicle registration. Vehicle information must also be reported. Any upgrades that have been done to the vehicle such as the installation of a Particulate Matter (PM) Filter or January odometer readings for vehicles claiming a mileage extension must be reported. To continue using a compliance option from the prior year must re-select the compliance option by checking

the applicable box on form 112b. Vehicles sold or purchased can be reported to use a compliance option any time within 30 days of sale. Incomplete forms will not be accepted.

Owner Information (Form 112a)

Form 112a must be filled out if it is your first time reporting. It should also be filled out if there have been changes to the previously reported company information. If you need to update your previously reported company information be sure to provide your original TRUCRS ID on the top of the form. Fill out the rest of the form as requested, including the following sections: “Owner Information”, “Motor Carrier Identification”, “Contact Person”, and “Additional Information”. **If you are an owner operator filling out this form, the information needs to pertain to yourself, not the company for which you work.** Fields marked with an asterisk indicate information that is mandatory to process the form. Incomplete forms will be rejected. When completed, the form must be signed by the fleet owner, or responsible official.

Vehicle Information (Form 112b)

Form 112b must be filled out for each vehicle in your fleet. You must use a separate form for each vehicle being reported. If you have previously reported you must provide your TRUCRS ID at the top of the form and indicate the reason for submitting the form such as the addition of a vehicle, replacing a vehicle currently using a mileage option, sale of a vehicle, claiming a flexibility option, or the installation of a PM filter. If you wish to newly opt-in to a flexibility option, or wish to continue using a compliance option from the prior year you must select (or reselect) the compliance option by checking the applicable box on form 112b. Incomplete forms will not be accepted.

If you reported for a mileage based provision such as the Low Mileage Work Truck option, the Agricultural Vehicle extension, or the Low-Use exemption, you will need to report your odometer reading as it was on January 1 of the compliance year. .

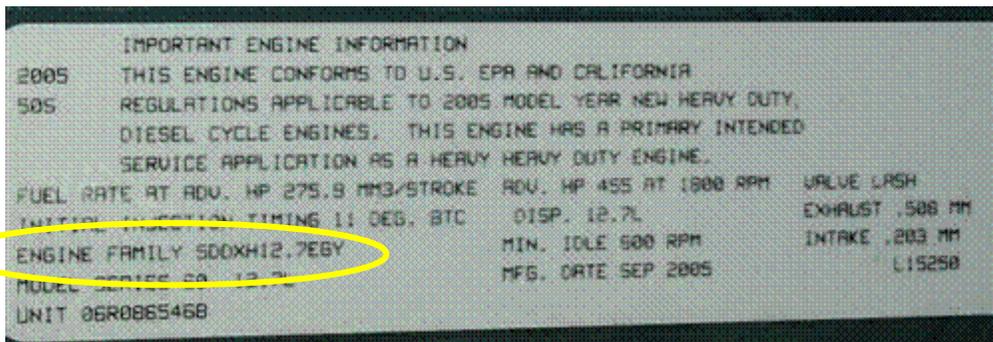

When reporting the “Vehicle Body Type” you must select from one of the choices on the list of “Vehicle Body Types” at the bottom of the page. If you select the “Sweeper 2 Engine” body type from the list, you will also need to fill out the information on the form about the auxiliary engine if it is rated at 50 horsepower or greater.

It is important that you read the following section titled *Description of Available Compliance Paths* prior to selecting a compliance option for your vehicle to ensure you report correctly and are eligible for the option you wish to select. If you submit a form requesting an option for which you are not eligible, the form will be rejected by our office and returned to you for correction – this ultimately will delay your ability to obtain a certificate.

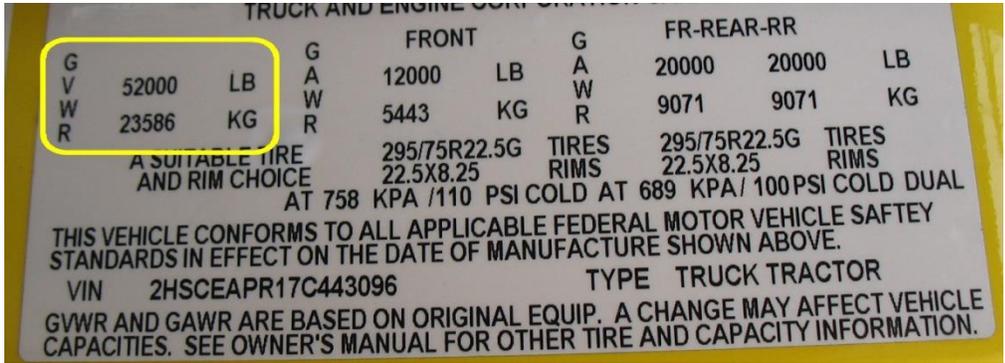

Reporting and Locating Required Engine Information

You must report ALL requested information regarding your vehicle and its engine. We have provided the following instructions to help vehicle owners find required engine information.

The image below shows an example of where an on-road engine family name can be found on the emission control label (ECL) on the engine. In this example the digits you would provide are: 5DDXH12.7EGY

Likewise, the following image shows an example of how to identify the GVWR of the vehicle. This label is typically located on the driver's side door jam. In this example, the GVWR of the vehicle is 52,000 lbs.

Description of Available Compliance Paths

PM Filter- Original Equipment- Engine was originally assembled with a PM filter by the manufacturer (on most 2007 or newer model year engines).

PM Filter- Retrofit- PM Filter retrofit has been installed. The owner must report the Verified Diesel Emission Control Strategy (VDECS) serial number, manufacturer name, VDECS family name, installer, installer city, installer state, and date installed. **Supporting documentation from the installer is typically requested.**

2018 Low-Mileage Work Truck (LMWT)- The LMWT option requires 100% of your fleet to meet the PM Filter requirement; therefore, you may no longer claim this option to obtain a delay to meet the PM filter requirement. You only need to report the January 2018 odometer reading. If you wish to claim a different compliance option, check the box for the applicable option on the vehicle page. See below for Low Mileage Work Trucks that have a PM filter installed.

2018 Low Mileage Work Truck (LMWT) with PM Filter- This option is for vehicles that meet the Low-Mileage Work Truck definition and have a PM filter retrofit installed. If you have PM filters on a heavier vehicle (GVWR greater than 26,000 lbs.) with a 1995 or older model year engine, you must select the LMWT with a filter option to delay upgrading to a 2010 model year or newer engine, stay below the 20,000 mile threshold, and report your odometer reading every year. A lighter vehicle (GVWR 14,000-26,000 lbs.) with a PM filter must all meet the same requirements as follows:

- For the 2018 compliance year, any LMWT with a 1998 or older model year engine.
- For the 2019 compliance year, any LMWT with a 1999 or older model year engine.

Heavier vehicles with 1996 or newer model year engines that have had a PM Filter retrofit installed must claim PM Filter Retrofit and may have unlimited miles until the replacement requirement deadline. Vehicles must be labeled with "CT" or "WT".

2018 Low Use Exemption- This option applies to vehicles that travel less than 5,000 miles per year, including vehicles with non-op registration that are not operated. A vehicle that travels more than 5,000 miles annually can still be reported for the low-use vehicle exemption as long as it operates less than 1,000 miles within California each year. Starting January 1, 2020, the 5,000 mile limit will decrease to 1,000 miles per year. The low-use option allows the vehicle to be exempt from PM filter and engine replacement requirements. Annual odometer reporting is required.

You must keep mileage records to document travel inside and outside California borders, and emergency miles to support reported miles traveled. Documentation includes but is not limited to Periodic Smoke Inspection Program (PSIP) test results, BIT inspection records, and third party maintenance records. If you are requesting to claim the low use exemption after a gap in compliance for the vehicle, you must provide this documentation prior to being considered eligible to use the option.

2018 NOx Exempt Area Operation- This applies to vehicles that operate exclusively in the following NOx Exempt counties: Alpine, Amador, Butte, Calaveras, Colusa, Del Norte, Eastern El Dorado, Glenn, Humboldt, Inyo, Eastern Kern, Lake, Lassen, Mariposa, Mendocino, Modoc, Mono, Monterey, Nevada, Eastern Placer, Plumas, San Benito, San Luis Obispo, Santa Barbara, Santa Cruz, Shasta, Sierra, Siskiyou, Northern Sonoma, Northern Sutter, Tehama, Trinity, Tuolumne, and Yuba. Before you claim the extension, 70% of your fleet must have PM filters by January 1, 2018. A "NE" label is required on both doors unless GPS tracking is used.

2018 NOx Exempt with PM Filter- This option is only for vehicles that operate exclusively in NOx Exempt Areas as defined above and have a PM filter retrofit installed. If you have PM filters on a heavier

vehicle (GVWR greater than 26,000 lbs.) with a 1995 or older model year engine or a lighter vehicle (GVWR 14,000-26,000 lbs.) you may select this option to delay upgrading to a 2010 or newer model year engine as long as you stay in the designated areas.

Heavier vehicles with a 1996 or newer model year engine may operate outside the NOx Exempt area until the replacement requirement deadline per the Engine Model Year schedule. The vehicle must then meet the replacement requirement or operate solely in NOx Exempt areas.

2018 Ordered 4 mos. Early- If you order a PM filter retrofit, replacement engine, or a new replacement vehicle on or before September 1, you will not be penalized if the installation or delivery is delayed past January 1 because of the manufacturer. You will be allowed until May 1 of the applicable compliance year to upgrade the vehicle. Fleet owners will need to submit a copy of their purchase order in January to trucrs@arb.ca.gov for verification before the vehicle can use this option.

The initial opt-in period for the options below has passed. Only a vehicle replacing one that previously claimed the option may newly use the option.

2018 Agricultural Vehicle Mileage Extension- This option applies to diesel trucks with a GVWR greater than 14,000 lbs. that are exclusively used for agricultural operations. Mileage limits apply and annual odometer readings are required. An "AG" label is required on both doors. The number of agricultural vehicle extensions cannot be higher than the number of trucks in the fleet on January 1, 2009. The number of available Agricultural Vehicle extensions is indicated in TRUCRS at the bottom of the Compliance status page. You are also required to report January 1 odometer readings annually for the vehicles using the Agricultural Vehicle Mileage Extension. No additional trucks can be added to use this option unless they are replacing other trucks already claiming this extension. The replacement vehicle must be placed in service within a year and the engine must be at least one model year newer than the one being replaced.

2018 Agricultural Specialty Vehicle-Outside SJV- An "AG" label is required on both doors. The vehicle may not operate in the San Joaquin Valley.

2018 Agricultural Specialty Vehicle-Statewide- An "AG" label is required on both doors. This vehicle may operate in all areas of California, including the San Joaquin Valley.

2018 Cattle Seasonal- This option applies to trucks that exclusively transport cattle. For-hire cattle livestock truck owners will only be exempt for the specified spring and fall cattle season during the year. The spring season will begin May 1 and end June 15, and the fall season will begin October 1 and end November 15. A "CS" label is required on both doors.

2018 Cattle Not For Hire- This option applies to cattle trucks that exclusively transport cattle and will operate solely not-for-hire. The livestock module must be permanently attached to the truck or trailer and must be used only for the purpose of hauling cattle. Owners can operate under this extension all year, but must present a brand certificate to ensure the brand of the livestock being hauled is registered to the hauler outside the spring and fall cattle season periods. The truck must be labeled with the letters "AG".

2018 Log Truck Phase-In Option- This option applies to vehicles with a GVWR greater than 33,000 lbs. that have permanently attached log bunks and exclusively transport logs. The number of log truck extensions cannot be higher than the number of trucks in the fleet on January 1, 2009. The number of available Log Truck vehicle extensions is indicated in TRUCRS at the bottom of the Compliance status page. At least 50% of the log trucks reported for this option should have 2010 or newer model year engines by January 1, 2018. This means fleets with only one Log Truck using this option must replace the vehicle with one that has a 2010 or newer model year engine by 2018. An "AG" label is required on both doors.

Form 112a - Owner Information Reporting 2018 Truck & Bus Regulation

* Required Information

Use this form if you have not previously reported, or if updating information.
 Submit only one form per fleet, with one Vehicle Information Form (Form 112b) for each qualifying vehicle.

TRUCRS ID (Skip if reporting for first time):	TRUCRS ID of Parent Company (if any)
---	--------------------------------------

I am reporting a change to the information previously reported about my company

Owner Information

Legal Owner First Name*	Legal Owner Last Name*
-------------------------	------------------------

Company/ Agency Name (and DBA) *	Tax Identification Number*

Signature of Owner or Responsible Official*	Date*

You must provide information about your business on this form if you are reporting for the first time. You may also use this form if you need to update your company information. In addition, you will need to attach a vehicle information form (form 112b) for each diesel vehicle in your fleet that you are reporting and indicate at the top of the form whether you are adding, removing, or editing the vehicle. If you do not have a TRUCRS ID, one will be assigned to you when you turn in your fleet information. Fleets that reported previously should identify the TRUCRS ID in the space provided. If you have already reported, it is not necessary to fill out the owner form unless you are updating the company information.

If you are a company with different divisions, each division will be responsible for complying separately. Submit a form for each fleet manager that will be reporting fleet information and attach the appropriate vehicle forms for each division. Information submitted by paper will be entered into the online reporting system and users will be able to manage their fleet online. If you are a subsidiary of a corporation, please report the TRUCRS ID of your corporate parent at the top of the form (see right side). The TRUCRS ID of your corporate parent is assigned when the corporate parent reports to us so that the fleet size can be determined.

On the Owner Information Form, you will need to enter information about the fleet owner, responsible official, the contact person, any motor carrier numbers you operate under and some additional information needed for determining compliance. All required fields must be completed and are marked with an asterisk. If you do not complete the form, your application will be considered incomplete and returned.

Mail the owner information form and a vehicle information form for each vehicle to:

California Air Resources Board
PO Box 2815
Truck & Bus Reporting, 5th Floor
Sacramento, CA 95812

If you have any questions or need help completing the forms, please contact us at 866-6DIESEL (866-634-3735) or by email at: trucrs@arb.ca.gov.

Form 112b - Vehicle Information 2018 Truck & Bus Regulation

*Required Information

Complete one form for each vehicle and submit with Owner Information Reporting Form 112a

If you have previously reported your owner information, provide the TRUCRS ID and you do not need to fill out the Owner Information Form 112a. Check the appropriate box below if you are adding or removing a vehicle from your fleet or if you are editing previously reported information. If you are reporting for the first time, complete all sections for each vehicle along with Form 112a. **TRUCRS ID:** _____

- Add new vehicle to fleet
- This vehicle is replacing a vehicle that was using a mileage based extension (fill out odometer reading information below)
- Remove previously reported vehicle. Date removed: _____ Final Odometer reading: _____
- Report change in compliance option for a previously reported vehicle. Date of change: _____ Odometer reading: _____
