

Reporting with Repeating Serial Numbers

In most cases, engine and vehicle serial numbers should be unique to a single engine or vehicle. However, in some cases the manufacturer may have made duplicate engines or vehicles with the same serial numbers. DOORS will not accept a spreadsheet or an online entry with a repeated vehicle or engine serial number until the vehicles have been assigned EINs. For repeating serial numbers, add a letter to the end of the serial number to differentiate it from the vehicle or engine which has the same serial number.

Incorrect **Correct**

Vehicle Serial #	Vehicle Serial #
HGW238237	HGW238237
DFE3829298	DFE3829298
DFE3829298	DFE3829298 b
DFE3829298	DFE3829298 c
RKW230921	RKW230921

After your data is reviewed by ARB and you receive EINs, the system will allow repeating vehicle and engine serial numbers. You may then correct your serial numbers in the DOORS [online edit screens](#), as shown below. To delete the letter, select and delete it, and then hit "Enter Data".

Line #	EIN	Veh serial num	Your veh num	Type	Manufacturer
3	KC6P48	DFE3829298 a	393	Off-Highway Trucks	ACADIA

May be deleted.
