

Email to DOORS Fleets that have Electric Vehicles

Date Sent: July 03, 2014

Subject: Electric Vehicle Reminder

Dear Fleet Owner/Contact,

Thank you for reporting your off-road diesel vehicles in the Diesel Off-Road Online Reporting System (DOORS) for the In-Use Off-Road Diesel Vehicle Regulation (Off-Road Regulation). You are receiving this email because you have reported an electric vehicle(s) in DOORS. The Off-Road Regulation is meant to include diesel vehicles and may only include an electric vehicle if certain specific conditions exist. We want to ensure your vehicle(s) meets these conditions:

- a. you can demonstrate the electric vehicle serves a function and performs the work equivalent to that of diesel vehicles and is used for a purpose for which diesel vehicles are predominantly used;
- b. the electric vehicle is used predominantly outdoors; and
- c. the electric vehicle is not already included in the fleet average emission level requirements for Large Spark Ignition (LSI) Engine Fleets (except for airport ground support vehicles purchased prior to January 1, 2007).

If any of the above criteria does not apply to your electric vehicle(s) reported in DOORS, you must delete the vehicle(s) from your DOORS account (you can do so by selecting "delete" for the specific vehicle in the Vehicle and Engine page). Including an electric vehicle in your DOORS fleet when the vehicle does not meet the above criteria may result in reporting and/or emissions violations.

If you have questions about including an electric vehicle in your DOORS fleet, or about how to delete a vehicle from DOORS, please contact the DOORS hotline at 1-877-59DOORS (877-593-6677) or doors@arb.ca.gov.

For information regarding the LSI regulation, please contact the LSI hotline at 800-387-2992 or visit <http://www.arb.ca.gov/lisi>.

Sincerely,

Off-Road Implementation Staff
