

Email to Fleets with Possible Portable Equipment

Date Sent: December 8, 2015

Dear Diesel Off-road On-line Reporting System (DOORS) fleet contact,

This is a reminder that the DOORS system is not the appropriate place to report portable (i.e., tow-behind or other non-self-propelled) equipment. DOORS is the reporting system for ARB's in-use off-road diesel vehicle regulation. Portable equipment such as generators, compressors, and chippers may be required to have a permit from the local air district. Failure to appropriately register or permit portable equipment could subject you to enforcement action. If you have incorrectly reported portable equipment in DOORS, please remove it by clicking "**Delete**" from the **Vehicle & Engine page** (do not click "Sell/Retire") within 30 days of receiving this notice.

If you have portable equipment, please contact your local Air Pollution Control District or Air Quality Management District to check if a permit is required for your portable equipment. If a permit is required and the equipment is eligible, you may choose to register it through ARB's Portable Equipment Registration Program (PERP). Please be advised that engines may have to meet current PERP eligibility requirements for initial registration.

The auxiliary engine on a two-engine vehicle that is subject to the in-use off-road diesel vehicle regulation must be reported into DOORS and may also be required to have a local air district permit or PERP Registration. More information on properly reporting two engine-vehicles can be found at <http://www.arb.ca.gov/msprog/ordiesel/faq/two-engine-vehicles.pdf> .

For more information on PERP, please visit <http://www.arb.ca.gov/portable/portable.htm> or call the PERP Information Line at (916) 322-4337. For more information on reporting in DOORS, call the DOORS hotline at 877-59DOORS (877-593-6677) or email doors@arb.ca.gov.

Many thanks,
ARB Off-Road Implementation Staff
