

--FINAL--

**Evaluation of
California's Enhanced Vehicle
Inspection and Maintenance Program
(Smog Check II)**

Release Date: July 12, 2000

California Environmental Protection Agency

Air Resources Board

--FINAL--

**Evaluation of California's
Enhanced Vehicle Inspection and Maintenance Program
(Smog Check II)**

Release Date: July 12, 2000

This report is available for downloading from the Air Resources Board Internet web site at <http://www.arb.ca.gov/html/smog.htm>. To obtain this document in an alternative format, please contact the Air Resources Board ADA Coordinator at (916) 322-4505, TDD (916) 324-9531, or (800) 700-8326 for TDD calls from outside the Sacramento area.

This report has been reviewed by the staff of the Air Resources Board and approved for publication. Approval does not signify that the contents necessarily reflect the views and policies of the Air Resources Board, nor does the mention of trade names or commercial products constitute endorsement or recommendation of use.

CONTENTS

	<u>Page</u>
EXECUTIVE SUMMARY	ES-1
Major Findings	ES-1
Changes from the Draft Report.....	ES-2
Background.....	ES-3
I/M Review Committee Report.....	ES-5
Evaluation Method	ES-5
Results.....	ES-8
Options For Increasing the Effectiveness of the Smog Check II Program	ES-11
Impacts of the Shortfall and Need to Implement Program Improvements.....	ES-13
I. BACKGROUND	I-1
A. History of Smog Check in California.....	I-1
B. History of the 1994 Ozone SIP.....	I-2
C. Transportation Conformity.....	I-3
D. "1994 SIP Currency"	I-4
E. 1997 Legislative Changes.....	I-4
F. Reporting Requirements	I-5
II. SMOG CHECK PROGRAM DESIGN	II-1
A. Program Design Envisioned in the SIP	II-1
B. Current Program Design	II-3
III. ROADSIDE DATA ANALYSIS	III-1
A. Introduction	III-1
B. Roadside Analysis Disclaimers	III-2
C. Fleet Average ASM Concentrations and Predicted FTP Emission Rates.....	III-4
D. Fleet Average ASM Concentrations.....	III-5
E. Methodology for Fleet Average Emissions Calculations	III-8
F. Fleet Average Predicted FTP Emissions.....	III-10
G. Equations for Estimating California Fleet FTP Emissions	III-12
H. Results	III-15
I. Roadside Gas Cap Testing	III-15
IV. DRAFT EMFAC2000 MODEL ANALYSIS	IV-1
A. Comparison of Draft EMFAC2000 and Roadside Data	IV-1
B. Draft EMFAC2000 Modeling Runs.....	IV-3
C. Draft EMFAC2000 Output: Exhaust Emissions.....	IV-4

D.	Draft EMFAC2000 Model for Evaporative Emissions.....	IV-4
V.	SIP ANALYSIS.....	V-1
A.	SIP Commitment: Emission Reductions Claimed.....	V-1
B.	SIP Commitment: Emission Reductions Achieved.....	V-1
C.	Summary of Enhanced I/M Emission Reductions Achieved.....	V-9
VI.	INCREASING PROGRAM EFFECTIVENESS.....	VI-1
A.	Public Comments on Program Improvement Options	VI-1
B.	Improvements That Are Already Underway.....	VI-2
C.	Program Improvement Options	VI-3

APPENDIX A: CALCULATING EMISSIONS FROM ROADSIDE TEST RESULTS

TABLES

Table ES-1: Comparison of Current Smog Check Programs	ES-4
Table ES-2: Effectiveness of Enhanced I/M in Summer 1999.....	ES-10
Table ES-3: Effectiveness if Current Enhanced I/M Program Had Been in Place Throughout 1999.....	ES-10
Table ES-4: Impact of Older Vehicle Exemption on Effectiveness in 1999	ES-11
Table I-1: Emission Reductions Assumed in the Approved SIPs From Enhanced I/M.....	I-3
Table II-1: Comparison of Current Enhanced I/M Program to SIP Assumptions	II-4
Table III-1: ASM2525 Emissions Concentrations	III-6
Table III-2: ASM5015 Emissions Concentrations	III-7
Table III-3: Predicted FTP Emission Rates	III-11
Table III-4: Roadside Results	III-15
Table IV-1: Comparison of Roadside and EMFAC2000 [g/mi] (1999)	IV-2
Table IV-2: Comparison of Percent Reduction in Exhaust Emission Rate due to Enhanced I/M Roadside Testing vs. EMFAC2000 (1999).....	IV-2
Table V-1: Emission Reductions (tons per day) from Enhanced I/M in the Approved Ozone SIP by Nonattainment Area for Each Year	V-2
Table V-2: Effectiveness of Enhanced I/M Compared to Program Envisioned In SIP	V-7
Table V-3: Percent Vehicles in Enhanced I/M in the 1994 SIP vs. the Actual Percent Vehicles in Enhanced I/M (1999)	V-8
Table V-4: Emission Reductions Achieved in SIP Currency (tons per day) From Enhanced I/M in Each Nonattainment Area EMFAC7F (EMFAC7G for The South Coast) (1999).....	V-10
Table V-5: Emission Reductions Achieved in SIP Currency (tons per day) From Enhanced I/M in Each Nonattainment Area for Each Milestone Year	V-11
Table VI-1: Potential Emission Reductions from Adding Areas Greater than 50,000 Population in San Joaquin Valley in 2005	VI-3
Table VI-2: Emission Benefits of Current Smog Check Program South Coast in 2005	VI-4
Table VI-3: Potential Emission Reductions from Improved Evaporative Testing South Coast Air Basin in 2005.....	VI-5

Table VI-4:	Comparison of Emissions Measured at Different Types of Stations ASM 2525 Test for Hydrocarbons	VI-7
Table VI-5:	Potential Emission Reductions from Directing Additional Vehicles to Test-Only and High-Performing Stations South Coast Air Basin In 2005	VI-8
Table VI-6:	Potential Emission Reductions from Increasing Cut Point Stringency South Coast Air Basin in 2005	VI-9
Table VI-7:	Potential Emission Reductions from Loaded-Mode Testing Heavy-Duty Gasoline Vehicles South Coast Air Basin in 2005	VI-10
Table VI-8:	Potential Emission Reductions from Adding Additional Portions of Nonattainment Area Sacramento in 2005	VI-11
Table VI-9:	Potential Emission Reductions from Eliminating the 30-Year Rolling Exemption South Coast Air Basin in 2010.....	VI-12
Table A-1:	Emission Reduction from Enhanced I/M in 1999.....	A-1
Table A-2:	Predicted emission Rates and Overall Reductions Achieved By Enhanced I/M	A-2

FIGURES

Figure IV-1: Passenger Car Exhaust Hydrocarbon Emission Rates, Draft EMFAC2000.....	IV-6
Figure IV-2: Passenger Car NOx Emission Rates, EMFAC2000.....	IV-7
Figure IV-3: Passenger Car CO Emission Rates, Draft EMFAC2000.....	IV-8
Figure IV-4: Light-Duty Truck HC Exhaust Emission Rates, EMFAC2000.....	IV-9
Figure IV-5: Light-Duty Truck NOx Emission Rates, EMFAC2000	IV-10
Figure IV-6: Light-Duty Truck CO Exhaust Emission Rates, EMFAC2000	IV-11
Figure IV-7: Medium-Duty Truck Hydrocarbon Exhaust Emission Rates, EMFAC2000.....	IV-12
Figure IV-8: Medium-Duty Truck NOx Emission Rates, EMFAC2000	IV-13
Figure IV-9: Medium-Duty Truck CO Emission Rates, EMFAC2000	IV-14
Figure V-1: Passenger Car Exhaust Hydrocarbon Emission Rates: Current Enhanced vs. SIP Enhanced, EMFAC2000	V-6
